 Dansville, New York

FRENCH DOUBLE FLOWERING LILACS

2 to 2-1/2 ft.
 plants, each
 \$1.75; 3 for
 \$4.95, postpaid

BLUE (Alphonse
 Lavallée). Soft
 blue-violet in large
 clusters. A Great
 favorite.
 MAR 4 1953
 U. S. Department of Agriculture
 WHITE (Mme. Cas-
 imir Perier). Very
 large, double flowers
 of purest white.

WINE - RED

(Charles Joly).
 Its narrow, up-
 right habit of
 growth is adapt-
 ed to the small-
 er garden where
 space is limited.

PINK (Kathar-
 ine Havemey-
 er). A gorge-
 ous mass of
 double flowers,
 very full with
 immense spikes.

LAVENDER
 (Michel Buch-
 ner). Midsea-
 son. Bluish li-
 lac.

NEWEST

Everbearing

Raspberry

Now you can plant a Raspberry that will produce an abundant crop in June and a crop of equal size in September. Fruit comes earlier and is larger, and of better quality than any other Raspberry.

Developed and introduced by Prof. George L. Slate of the New York State Experiment Station. (See pages 30 and 31.) This station has long been known for its leadership in developing new and successful fruits.

Ripens 2 to 4 weeks ahead of other varieties in the fall. The berries are firm and don't crumble.

A World Beater in Everbearing

RASPBERRIES —

Red Rich Strawberry

The Champion of All Everbearing Strawberries

Plant Patent No. 993

Here at last is the Strawberry that's a real sensation. A one-in-a-million chance seedling. Enjoys all the finest qualities known to Strawberry plants. **READ WHAT UNIVERSITY REPORT SAYS:** Quote: "Of the 29 everbearing varieties we tested here last season Red Rich is by far the best. I think it is the everbearer for which we have been waiting. (Signed) Herchel L. Boll, Assistant in Pomology, Agriculture Dept., University of Illinois."

BEARS ALL SUMMER—gives you luscious, honey sweet Strawberries all summer long throughout the fall until winter freeze.

MAMMOTH PLANTS—HUGE BERRIES, we've never seen plants so big and strong. This means disease resistant strength and enormous yields.

PLANT BY NEW METHOD, WONDERFUL YIELDS. Each Red Rich plant shipment carries new "Space System" planting instructions. Follow carefully and get up to a pint per plant the first year and up to a quart per plant the second. Fewer plants needed—25 plants per person is plenty.

TOPS FOR FREEZING. Slice one. They're red clear through. Plenty of natural sugar and a firm texture that holds shape when thawed. Wonderful winter desserts.

ROSE Leaders for 1953

MA PERKINS (Plant Patent Applied For)

Introducing still another new color in Floribundas—a sparkling color—shell-pink—a delight to behold from start to finish. Newest All-America Winner. The most fragrant Floribundas ever created. **\$2.25 each; 3 for \$6.00; 12 for \$24.00, postpaid.**

Tree Roses

Truly the aristocrat in the garden. Breath-taking loveliness that grow on straight stems from 3 to 4 ft. high.

An umbrella of color blooms, our clients will welcome these Tree Roses as a favored addition in the garden.

Choice of red, pink, yellow, two-tone.

Price: \$5.50 each; 2 for \$10.00, postpaid.

CHRYSLER IMPERIAL

Has vivid, rich tones of crimson-red in the broad open petals, heightened by darker overtones of glowing oxblood-red, and the gemlike lustre of garnet in the folds. Retain their sparkling beauty throughout the life of the large beautifully formed flowers. Long tapering buds have beauty of maroon-red velvet. Bush compact and well-balanced. **\$3.00 each; 3 for \$7.95; 12 for \$31.80, postpaid.**

VOGUE

(Patent No. 926)

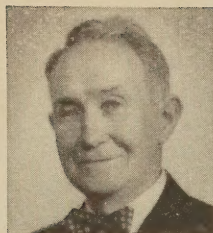

Here's a grand new introduction of the Floribunda family. Intensive brilliant, cherry-coral with perfectly formed, high centered, Hybrid Tea-shaped, 3-4 inch flowers. Reaching a height of 2½-3 ft. **Postpaid, \$2.25 each; 3 for \$6.00; 12 for \$24.00.**

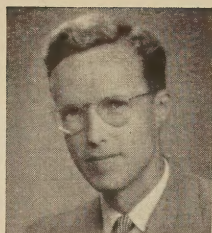

FASHION (Patent No. 789)

Finest Floribunda Rose ever created. Oriental red buds open gradually to a lighter, luminous coral suffused with gold. Constant new growth replaces the old, so it is always covered with clusters of exquisite blooms. Height 2½ to 3 ft. **Price: \$2.00 each; 3 for \$5.25; 12 for \$21.00, postpaid.**

We Sell by Mail — the Finest Nursery Stock Grown — to Garden Lovers Everywhere

PLEASE READ BEFORE ORDERING YOUR SELECTIONS

1. Order now for shipment at planting time.
2. Unless you specify a specific date, we will ship at the proper planting time in your section.
3. An envelope on which we pay postage is enclosed for your convenience.
4. For ordering, please use order blanks enclosed. Letters should be written separately to avoid confusion and mistakes, and to insure prompt reply.
5. Our terms are **NET CASH** with order. Unless otherwise specified, prices are f.o.b. Dansville.
6. A 25% deposit is required on all C.O.D. orders.

HOW TO REMIT

Send Money Order or Check with your order. You save money by sending remittance with order. The Post Office and Express Company make extra charges for C.O.D. shipments.

QUANTITY RATES

Take advantage of our lower rates for quantity purchases. For less than 6 trees remit at each rate; 6 to 12 trees of one sort such as Apples, varieties alike or assorted, entitles you to the 12 rate; 12 to 25 trees alike or assorted, entitles you to the 25 rate; 25 or more trees, alike or assorted, entitles you to the 50 rate.

Use Coupon Enclosed for Ordering Your Favorite Magazine.

RIPENING DATES

With our description of varieties, we've indicated the approximate ripening date at which fruit is ripe and ready to eat in western New York. This date will vary with the season and in different sections of the East. The fruit may ripen a few days to a week earlier or later.

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Union Trust Co., Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; Security Trust Co., Dansville, N. Y.; to any person whose letter appears in this catalog, or to your State Experiment Station or College.

RA.PID.GRO

Try It Once—You'll Never Use Anything Else!

The Miracle Plant Food

1 pound of Ra-Pid-Gro added to 22 gals. of water gives you a complete, quickly available, easily prepared plant food.

Analysis
23% Nitrogen
21% Phosphate
17% Potash

WHAT IS RA-PID-GRO?

Ra-Pid-Gro is a complete, concentrated plant food. It is made into an immediately available, effective liquid plant fertilizer by simply adding water. It speeds up growth of plants now in place, and assures more successful transplanting of new plants.

HOW IS IT USED?

Just add water at the rate of 1 lb. of Ra-Pid-Gro to 22 gallons of water. It is ready to use as soon as the Ra-Pid-Gro dissolves. Apply around each plant according to directions on the package. For a small number of plants mix at the rate of 1 teaspoonful to a quart of water.

WHAT WILL IT DO?

Ra-Pid-Gro works almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. All the vital plant food elements are present in this remarkable discovery and, since it is applied in liquid form, are readily available to the roots of the plant.

OUR GUARANTEE

We positively GUARANTEE any nursery stock you buy from this catalog to grow. If any tree, bush, shrub or plant from our nursery does not grow, we will replace it ABSOLUTELY FREE the next growing season.

All we ask is that you follow the planting instructions mailed with your order acknowledgment and give the plants good care.

Report on losses to reach us ON OR BEFORE AUGUST 1st, FOLLOWING PLANTING.

We ship only STRONG, HEALTHY STOCK OF THE BEST QUALITY. That's why we can make such an iron-clad guarantee.

WE PAY POSTAGE

Most plants listed in the catalog are delivered to your home postpaid.

Trees too large for parcel post shipment are sent by express—you pay the charges.

Where there is a mixed order of postpaid and express items, we ship the whole order express, prepaying in advance, our portion of the charges.

Kelly's FLOWERING SHRUBS

BEAUTY BUSH (Kolkwitzia)

A magnificent flowering shrub, growing to a height of 7 feet. Upright growing branches arch gracefully outward, and during the June blooming season are weighted downward with pink, bell-like flowers. Hardy and not too particular as to soil conditions. 18-24 in., 95c each; 3 for \$2.70. 2-3 ft., \$1.15 each; 3 for \$3.25.

GOLDEN SYRINGA (Philadelphus Aurea)

Always a "showy" shrub because of its all-season golden yellow foliage. Flowers are intensely white, with a fragrance which is delightful, more delicate, yet as penetrating in the garden as that of the Jasmine. Grows to a height of 4 to 5 feet, and is not fussy about location—doing well in smoky or dusty places. **Each 2 for**
 12-18 in. \$1.50 \$2.85
 18-24 in. 2.00 3.75

5 GRAND BUDDLEIAS

(Summer Lilac)

CHARMING. Long sprays of lavender-pink.

DUBONNET. Large sprays of wine-red.

ILE DE FRANCE. Violet-purple and very fragrant.

ORCHID BEAUTY. Orchid-pink with brilliant orange eye. Flower heads up to 24 inches in length.

ROYAL RED. (Pat. No. 556.) Rich dark royal purple. Large sprays 2 feet in length. New variety of merit.

The late Summer Lilac. Resembles Lilacs in shape and appearance. Long, slender spikes through late summer and fall. Plants grow 4 to 5 feet tall.

Each 95c; 3 for \$2.70, postpaid.

The Feathery **TAMARIX**

SUMMER GLOW. There is a lacy loveliness and charm about this shrub not found in others. Beautiful silvery blue-gray foliage is like a veil. A sharp and delightful contrast is made by the airy Tyrian rose flower spikes appearing on top of the delightful foliage all summer. Lovely for cutting. Very tolerant to salt air and wind. Ultimate height about 8 feet. Can be pruned and kept to 5 to 6 feet if desired. **Each 2 for**
 12-18 in. \$1.50 \$2.95
 18-24 in. 2.00 3.75

Pink Flowering ALMOND

A charming, old-fashioned early spring flowering shrub, growing to a height of 4 feet. Unsurpassed in beauty when completely covered with a mass of very double, vivid pink blossoms, which appear in great profusion before the leaves unfold.

	Each	3 for
12 to 18 in.	\$0.75	\$2.00
15 to 24 in.95	2.70
2 to 3 ft.	1.15	3.25

CORALBERRY Indian Currant

A 3 to 4 ft. shrub with delicate, little, pink flowers against a reddish green foliage, followed by coral-colored berries that remain most of the winter. Keep birds near, with abundance of these berries.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

CALYCANTHUS (Sweet-Scented Shrub)

Many know it as the Carolina Allspice. The handsome, bronze-chocolate flowers produced in June are most entrancing, because of their spicy fragrance. Odd looking pods develop later which are filled with brown, aromatic seeds. Glossy corrugated foliage adds to its unusual appearance. Grows 4 to 6 feet tall, and spreads over an area equally broad.

	Each	3 for
18-24 inches	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

GOLDEN PRIVET

Adds That "Bit of Color" to Every Planting

A striking shrub, growing to a height of 4 to 6 feet, but can be trimmed to any desired height or shape. Bright yellow foliage, making it a fine specimen or as a color accent in the shrub border. We offer especially bushy plants.

	Each	3 for
15 to 18 in.	\$0.95	\$2.70
18 to 24 in.	1.15	3.25

RED FLAME BUSH

Red-Leaved Barberry

Very charming all season with its flattering bronze-red foliage. Adds that spot of color needed to brighten up the landscape. Must be planted in a sunny location to maintain its rich red coloring. Grows naturally to a height of 3 feet, but may be pruned to any size or shape desired.

	Each	3 for
18-24 in.	\$0.90	\$2.55
2- 3 ft.	1.15	3.25

EVERGREEN BITTERSWEET (*Euonymus radicans vegetus*)

A wonderful berried vine. Can also be used as a shrub or colorful hedge.

Will climb brick or wood, or can be planted as a hedge. Makes an excellent shrub when pruned and does well in a northern exposure. Extremely hardy.

	Each	2 for
3-yr., large	\$1.75	\$3.00
2-yr., selected	1.25	2.35

Everblooming PINK SPIREA

The finest Spirea ever introduced. Enormous spikes of cameo-pink flowers up to 12 inches long on strong stems up to 4 feet long. Will bloom all summer if flowers are kept cut. Excellent foliage; no pests. Grows in any ordinary soil, and can stand a little shade.

	Each	3 for
18-24 in.	\$1.00	\$2.75
2- 3 ft.	1.50	4.25

DEUTZIA, Pride of Rochester

Kelly Shrubs

Are Strong, Fibrous
Rooted 2-Yr. Specimens
That Will Bloom Early
and Add Value to Your
Home Garden

DEUTZIA

Home Garden

Vigorous, upright, hardy
and free blooming. Small,
white, Carnation-like flowers,
changing to red in center. Grows 5 to
6 feet at maturity.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

Purple Lilac

THERE IS NOTHING LOVELIER THAN LILACS

The living landmarks; hardy and
vigorous in any soil or climate, grow-
ing 6 to 8 feet tall. Large clusters of
flowers, very fragrant. **Offered
in both Purple and White. State
color desired.**

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

COTONEASTER DIVARICATA

The Berried Shrub That
is Particularly Adapted
to Accent Corner of a
House Planting

Is upright in growth, though the
branches are spreading. The leaves are
pointed, glossy green above, lighter be-
low, turn red in autumn. The flowers
are pink and appear in June. The
fruit is oblong, ripening in August and
September, and stays red for a long
period. Grows 3-5 ft.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

SYMPHORICARPOS Chenaulti

Improved Coralberry. Pink flowers in June, followed
by red and white berries. Foliage rich shade of green.
Hardy. 3 to 4 ft. at maturity.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

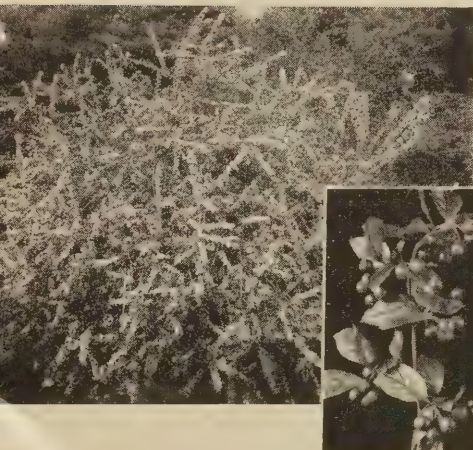

THE POPULAR ALL-AMERICAN LARGE FLOWERING SNOWBALL

(Viburnum Opulus Sterile)

There are few June-flowering shrubs which can
match the rare beauty of the pure white flowers ar-
ranged in perfectly round "snowballs" 3 to 4 inches
across. It's a stately, erect grower dressed in beautiful
rich green foliage. Makes a handsome 6 to 8-ft. speci-
men.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

Sweet Scented VIBURNUM

Blossoms Toned Light Pink—With Spicy Fragrance

(Viburnum Carlesi)

This grand shrub is generally called the Pink Snowball. In the spring it is covered from top to bottom with very fragrant flowers that are light pink on the outside and the inside snowy white. It makes a nicely shaped bush 5 to 6 feet tall and just as wide, with branches right down to the ground. The deep green foliage colors a bronzy red in the fall. Is planted from coast to coast. It adds beauty and distinction to your planting.

	Each	2 for
12-18 inches	\$2.45	\$4.75
18-24 inches	2.95	5.75

Sweet Scented Viburnum

RED TWIG DOGWOOD

(Cornus alba sibirica)

Brings Fragrance and Color to Every Home Garden

A spreading shrub with bright red bark in the winter, which adds a burst of color to your shrubbery in the winter. In summer it has bright green foliage, creamy white flowers in the spring, followed by whitish berries. Grows 6 to 7 feet tall.

	Each	3 for
12-18 in.	\$0.75	\$2.15
18-24 in.95	2.70
2- 3 ft.	1.15	3.25

Red Twig Dogwood

FRENCH DOUBLE FLOWERING LILACS

All double flowering varieties that will last a lifetime. You get a wealth of sweetly perfumed blossoms the first year after planting, and they will bloom every year.

See Front Cover for
List and Prices.

REGEL PRIVET

A beautiful shrub. Useful where a low-growing plant is required. Very hardy. Dark, shiny leaves. Graceful, drooping branches. Blue berries which hang on well into winter. Ideal for covering walls, banks, or a low foundation.

	Each	2 for
18-24 in.	\$1.25	\$2.25

All-American
National
Favorite*

SPIRAEA Van Houttei

Probably the best known of all the shrubs. Will tolerate shade and adverse city conditions. Grow in any soil. The pure white flowers which completely cover the arching branches

Buy Shrubs Direct From The Grower...

Blue Mist Spirea

The Exotic BLUE MIST Spirea (Caryopteris)

One of the best low-growing, fall-blooming shrubs. It makes a neat, compact, rounded bush about 2 feet tall, with narrow, silvery green foliage. From August to frost, it is covered with the many clusters of dainty blue flowers. The roots are hardy, but like a Peony bush, you cut off, each spring, the old canes and new ones come up. You are sure to like this shrub.

No. 1 plants, each \$1.00;
3 for \$2.70.

DOUBLE MOCK ORANGE

(Philadelphus, Virginal)

May and June finds the long slender erect branches heavily laden with lovely, pure white, sweet-scented double 2-inch flowers. Will tolerate smoke and other hard city conditions. Grows to an ultimate height of 4 to 6 ft.

	Each	3 for
12-18 in.	\$0.75	\$2.15
18-24 in.95	2.70
2- 3 ft.	1.15	3.25

SNOWBERRY

Waxy Berries in Fall

Small, pink flowers in June or July. Waxy white berries from August until spring. Attractive, dense foliage, and the berries attract the birds. Grows under most adverse conditions to 4 feet high.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

Silver Leaf Variegated DOGWOOD

(Cornus Elegantissima)

Outstanding accent plant. Leaves deep green in center, with wide border of silvery white. White flowers in early June, followed by attractive white fruits in late summer. Red stems furnish interest in winter. Stands very wet soil conditions.

	Each	2 for
18-24 in.	\$1.50	\$2.85
2- 3 ft.	2.00	3.75

Rose Gold PUSSY WILLOW

New. In late February or March has thousands of silvery catkins which progress through a fascinating series of color changes. First silvery gray, then turn silvery pink, then rosy pink dotted with hundreds of bright yellow stamens, finally become nearly solid gold. Low mounded plant. Attractive silvery foliage stays until winter. Catkins large, last for weeks and weeks. Can be forced indoors.

	Each	3 for
18-24 in.	\$1.50	\$3.75
2- 3 ft.	2.00	5.50

NEW! Forsythia "Spring Glory"

LARGER, BRILLIANT YELLOW
BLOOMS FOR EARLIEST COLOR

A new Forsythia which bears such masses of blooms that a plant in bloom in early spring is an almost unbelievable sight. The large yellow florets cover the branches, giving the effect of a giant sunburst. Canes grow erect with gracefully drooping tips. Hardy in all sections and thrives vigorously in ordinary soil.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

KELLY SHRUBS
are ALL
BLOOMING SIZE

Double GOLDEN KERRIA

The Globe Flower

Truly year around beauty. The button-like golden flowers cover the bush all summer. The very dense "saw-tooth" foliage serves as an interesting background. In winter the light green twiggy stems are very decorative. Grows 3-5 feet tall.

12-18 in.	\$1.15	\$2.25
18-24 in.	1.50	2.75

WEIGELA Eva Rathke

Famous for its scarlet, trumpet-shaped blooms and for its hardiness. Growing 3 to 5 feet high, it blooms heavily in June and moderately during the rest of the season.

Each 3 for

12-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

HYDRANGEA PEE GEE

A tall, stately shrub growing to 4 feet in height. Branches bending over with giant cone-shaped flowers which are white at first, then pink and late in fall turning to copper and bronze. When cut, they last for weeks inside.

Each 3 for

12-18 in.	\$0.75	\$2.15
18-24 in.	.95	2.70
2- 3 ft.	1.15	3.25

*Pink Bells
of Weigela*

WEIGELA ROSEA

June and July finds this perfectly formed, well-rounded shrub a mass of light pink blossoms, which possess a great depth of color. Under favorable conditions it will continue to blossom until stopped by frost. The average ultimate height is 4 to 6 ft.

Each 3 for

12-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

EUONYMUS ALATUS COMPACTUS

(Burning Bush)

Yellow flowers in May-June, followed by red fruits. In autumn the leaves turn brilliant coppery crimson tinged rose. Has unusual corky bark. Thrives in partial shade or full sun. Perfectly hardy, makes a compact bushy plant 4 to 5 feet wide. Not particular as to soil. Very ornamental and attracts attention spring, summer, fall and winter.

Each 2 for

12-18 in.	\$1.75	\$3.00
18-24 in.	2.25	4.00

VITEX

A 4-foot, dainty shrub of branching habit, which bears long spikes of lavender-blue flowers, forming a beautiful contrast to the silvery green foliage in August and September. 18-24 inches, each 95c; 3 for \$2.70.

SWEET HONEYSUCKLE

Lonicera Tartarica

Dainty, small, pink, trumpet-shaped flowers in May, followed by a profusion of red berries. Makes a large shrub, 6 to 8 feet both in height and width. Excellent for screening and specimen planting. Grows in the poorest soil.

Each 3 for

12-18 in.	\$0.75	\$2.15
18-24 in.	.95	2.70
2- 3 ft.	1.15	3.25

Kelly's Flowering Shrubs for Colorful Gardens

Extra Large → PUSSY WILLOWS *Always Welcome for House Decoration*

No bouquet would be complete in early spring without a few sprays of Pussy Willows. Grows 10 to 12 ft. high. Catkins are at least twice as large as those of the common Willow. They do well in damp locations.

	Each	2 for
18-24 in.	\$0.95	\$1.75
2- 3 ft.	1.15	2.20

Minnesota Snowflake

Minnesota Snowflake

(Plant Pat. No. 538)

The season of flowering is early summer. This plant is thoroughly hardy, a vigorous grower and long-lived. It will grow to a height of 8 feet. It can be kept to the desired height by trimming. It is a strong grower; therefore very useful for screen, tall border and specimen plantings.

	Each	3 for
18-24 in.	\$1.25	\$3.00
2- 3 ft.	1.50	3.75

Grow This Welcome New
Garden Shrub—a Lovely
Improved Mock Orange
Fragrant
Extra Large Double
Flowers

SPIRAEA Thunbergi

A Fountain-Like LOW GROWING SHRUB Always Attractive

A dwarf fountain-like bush that is very attractive at any time of the year. During the blooming season it is lavishly covered with delicate, snow-white flowers.

	Each	3 for
12-15 in.	\$0.95	\$2.70
15-18 in.	1.15	3.25

*Kelly's good shrubs
are always a life-
time investment.
They beautify
your home grounds
at a low cost*

Lilac Spiraea Spiraea Billardi

An upright habit of growth and long, narrow panicles of bright rose flowers make this a splendid Spiraea. It blooms in July and August, and does fairly well in partial shade. Height 4 to 6 feet.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

Deutzia Gracilis

A charming little "must" for every garden. Slender twigs covered with white flowers in May and June. Generally attains a height of 3 feet when fully matured.

	Each	3 for
12-15 in.	\$0.95	\$2.70
15-18 in.	1.15	3.25

Low Growing—Excellent for
Foundation Planting

Does Not Block Out Windows Because
of Dwarf Growing Habit

^ NANKING CHERRY TREE

Lovely Cherry-Like Blossoms That Bloom Before
the Leaves Appear
(*Prunus Tomentosa*)

5 feet. A fine shrub with attractive clean looking foliage. The stems are covered with a profusion of Cherry-like bloom before the leaves appear in early spring. The fruit, an attractive bright red Cherry, is similar to sour red Cherry in flavor. Good for pies and jam. A good plant for filling the corner between house and porch.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.25	3.50

Hills of Snow HYDRANGEA

*The Grandest of the Low Growing Large
Flowering Shrubs*

This easy growing shrub thrives everywhere and never fails to put on a display of showy, pure white, Snowball-like flowers. Grows approximately 3 feet tall. A good shrub for shady places.

	Each	3 for
18-24 in.	\$0.95	\$2.70
2-3 ft.	1.15	3.25

327 Williams Ave.,
Brooklyn 7, N. Y.
April 17, 1952.
Kelly Brothers Nurseries, Inc.

I recently received one Double White Dogwood tree and 2 Hansen Bush Cherry from your nursery, and I am taking this opportunity to compliment you on your excellent stock. I was very much satisfied to see such fine symmetrical branching and excellently developed root system.

Yours truly,
Albert Podob

Honeysuckle Zabeli

(*Lonicera Zabeli*)

**A Worth-While
Garden Shrub**

**Also Makes
Excellent Hedge**

Red Flowers, Red Berries, Attractive to Birds

Can be trimmed to low or medium height.

The most shapely bush and the finest foliage of all the bush Honeysuckles. A marvelous accent or specimen shrub. If you want a stunning flowering hedge at 4 to 5 feet, this is it. Sturdy, upright growth; attractive blue-green leaves. If you wish to keep it thick and formally trimmed, plant 1½ feet apart, but for its true informal beauty, plant 3 feet apart.

	Each	2 for
18-24 in.	\$0.95	\$1.75
2- 3 ft.	1.15	2.20

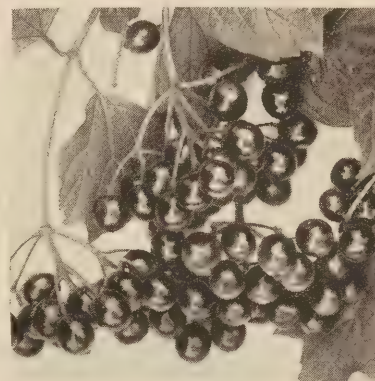

HIGH BUSH FLOWERING CRANBERRY BUSH

A Tall Growing Variety
Excellent for Screening
Out Unsightly Places

Quick Growing Habit
Fall Berries are
Attractive to Birds

One of the finest background and screen shrubs. Upright-spreading habit and healthy, deep green, 3-lobed leaves. Flowers heavily in May and June—white, flat clusters. Large clusters of scarlet berries remain in winter, make a valued tart jelly. Bright red fall foliage color. Grows equally well in shade or sun and in normal to wet soils.

	Each	2 for
18-24 in.	\$1.00	\$1.75
2- 3 ft.	1.25	2.25

Something to Rave About

The One and Only Cloud-Like Foliage Tree
That Looks Like a Volume of Smoke
A Worth-While Addition to the Garden

PURPLE FRINGE or Smoke Tree

A tree much admired for its curious fringe or hairlike flowers that cover the whole surface of the plant. Handsome foliage adds its share of beauty to the plant. Likes plenty of sunshine and light, well-drained soil. Grows to a height of 10 to 12 feet, and its spreading habit requires considerable space. Especially desirable as a specimen tree.

	Each	2 for
18-24 in.	\$1.25	\$2.25
2- 3 ft.	1.75	3.25

Althea, Rose of Sharon

BLUE HYDRANGEA

Blooms of charming blue throughout the summer. Most preferred of all Hydrangeas, due to its form and color. Soil should be very acid to bring out the blue color. To maintain soil acidity, mix 4 or 5 table-spoons of Aluminum Sulphate to a gallon of water, and apply to the soil for 2 to 3 weeks during the growing season. Aluminum Sulphate is listed on page 20. Grows in partial or full shade. Mound earth up around plant 10 or 12 inches for winter protection, same as for Roses. A real novelty.

	Each	2 for
2-yr.	\$1.75	\$3.00
3-yr., large	2.25	4.00

ALTHEA, ROSE OF SHARON

A hardy 6- to 8-foot shrub, with shamrock-green leaves, forming a back-drop for double, Roselike flowers. A most welcome sight in the fall.

SCARLET QUINCE

The Fire Bush

A first choice for rich, happy spring color for both indoor and outdoor beauty. Covered with masses of semi-double, brilliant scarlet flowers, even before the attractive shiny green leaves appear. This 3-5 ft. is a "must" in landscaping.

Each 3 for		
18-24 in.	\$0.95	\$2.70
2- 3 ft.	1.15	3.25

GOLD FLAME HONEYSUCKLE

From June until freezing, this magnificent vine is covered with showy clusters of large, fragrant flowers, rosy flame outside and gold inside. The attractive foliage, a rich blue-green, makes a perfect background for the brilliant flowers. Hardy, healthy, easy-to-grow, it thrives North, South, East and West, in full sun or partial shade. It can be used in so many places—trellis, porch, pergola, fence, fine for covering bank or cave or can be trained as a shrub.

Each 3 for		
2-yr., medium	\$0.95	\$2.70
2-yr., large	1.15	3.25

RED SPIRAEA

A choice, low growing shrub, distinctive in style and form. It produces masses of showy, bright crimson flower clusters in July, and if the old blooms are cut away, it will continue to bloom until frost. Nice for specimen planting as well as in groups. Ultimate height 18 to 24 inches.

Each 3 for

2- 3 ft.	1.50	2.75

KELLY'S

Newer Shrubs of Recent Introduction

CARDINAL SHRUB

Weigela Vanicek

Blooms spring, summer and fall. Plants set out this spring will bloom this season. Grows 6 ft. tall. Produce large trumpet-shaped flowers. **18-24 in., each \$1.25; 2 for \$2.35. 2-3 ft., each \$1.50; 2 for \$2.75.**

Winterberry

LYTHRUM, Robert

A sight to behold. Graceful spikes are covered almost from the ground to their 3-4 ft. tips with deep pink flowers. Blooms all summer. Hardy—developed in Canada, and grows anywhere. **Selected 2-yr. plants: each 95c; 3 for \$2.70.**

WINTERBERRY

EUONYMUS RADICANS ERECTA. A broad, spreading shrub clothed in rich bright green foliage that remains on the plant year round. It's a plant that blends well with established evergreen plantings. Thrives in sun or partial shade. Makes a shapely bush 4 to 5 ft. tall with red berries which hang on late in the season. This is not an ordinary shrub. Be the first to have it in your neighborhood.

	Each	2 for
12-18 in.	\$1.25	\$2.25
18-24 in.	1.50	2.75

Cushion-Mum

A Sensational Creation of the Flower Kingdom

One of the most popular garden favorites. Plant these beautiful flowers 2 to 2½ ft. apart in well-drained soil. They do well in full sun or partial shade. Our Cushion Mums are hardy and will bloom from late August up to the time of severe frosts.

BRONZE CUSHION. A large round plant if planted alone with hundreds of blossoms on at the same time. Requires little care, and is one of the prettiest of the Cushion Mums.

PINK CUSHION. It's the oldest one of the Cushion Mums, but one of the best. Makes a very large plant by early fall, loaded with blooms, often hiding all the leaves when fully in bloom. It's a sight in early September till late fall.

RED CUSHION. Blossoms are fiery red color that blends in well with the others. It has been known to have 500 blooms and some buds on 5 months after set out. Starts to bloom in September and continues until freezing weather.

YELLOW CUSHION. A bright yellow and blooms earlier than other colors. A thousand blooms open at one time on a well-cared for plant is a common sight. Every one likes a yellow Mum.

4 for \$1.95; 8 for \$3.50; 12 for \$4.75, postpaid.

PRODUCE BUSHELS OF BLOOMS

Professional LANDSCAPE SERVICE

at No Extra Cost

Now you can enjoy experienced, professional advice for beautifying your home grounds without charge. Savings on your purchases. Savings run as high as 30% to 50% when you buy direct from us, the growers.

EASY TO USE. All we need is a drawing or photograph of your home and grounds. A photograph is preferred. We also need to have approximate dimensions of the house and lawn.

Your photograph or drawing will be turned over to one of our experienced nurserymen, who has had years of experience in recommending and supervising landscape plantings. We will select the plants which will give you the most attractive arrangement for your grounds, and will send you a sketch indicating the location of each plant. Only plants best suited to your locality will be recommended. Complete instructions for planting will be included.

CATALOG PRICES. At the same time, we will tell you exactly what the plants he recommends will cost. There is no **EXTRA CHARGE** for our service. Your plants will be quoted at our regular catalog prices. **NO PLANS CAN BE PREPARED AFTER APRIL 1st.**

Bartlett Dwarf Pear Requires Limited Space

DWARF APPLES

All Kelly's Dwarf Apple trees are propagated by placing the variety on a special type of Malling Rootstocks, which were developed in England and which are imported from that country. These trees at maturity will reach a height of 12 to 15 ft. tall and they can be planted 15 to 20 ft. apart in your home orchard. Besides being a beautiful addition to the landscaping of your home they develop crops of fruit each year. You will have much enjoyment standing on the ground picking fresh luscious fruit from these small trees within 2 years after you plant them.

VARIETIES

Cortland, Double Red Delicious, Red McIntosh and Yellow Delicious

KRILIUM

The new sensational Monsanto Chemical Company introduction that turns hard clay into looselike soil at once and it stays that way for years. Makes better flower and vegetable gardens, better perennials and shrubs, and healthier house plants. This is not a fertilizer, but when used with it, fertilizer is more effective. Five pounds of Krilium will treat 40 square feet for 6-inch depth and 80 square feet for 3-inch depth. Instructions with each package. Use what you wish now, balance will keep. For making a new lawn it gives marvelous results even on the hardest clay.

1 pound for	\$1.75
5 pounds for	6.95

DWARF FRUIT TREES

Take Little Space to Produce Big Delicious Fruit

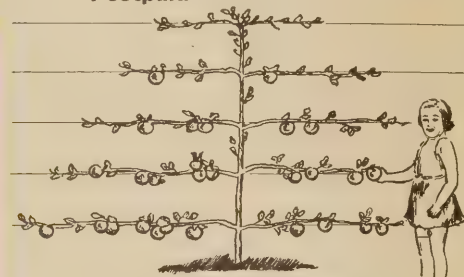

DWARF PEARS

All Kelly's Dwarf Pear trees are budded on Quince roots. This is the only known way to horticulturists to successfully grow Dwarf Pear trees. We list only 4 varieties, Bartlett, Clapp's Favorite, Duchess and Seckel, which we have found to do best on this rootstock. Other varieties, such as Beurre Bosc, and Kieffer, do not make a good union. Most of the Dwarf Pear trees we are offering this year have borne fruit in the nursery row. They will bear fruit after you have planted them at least the second year and bring many years of enjoyment and scores of successful crops as they develop into their full size.

The Wonder Plum of the Age

HOWARD'S MIRACLE PLUM

Its tantalizing and delicious flavor, great size, firm amber flesh, together with a delightful color, place the "Miracle Plum" in a class by itself. An astounding surprise to the palate, flavor not unlike Nectarine, Peach and Plum mixed; skin thin, and unnoticeable when eating fruit. Keeps well, delicious in preserves, fruit ripens over long period during July and August. Will bear fruit second year after planting. Beautiful ornamental tree of medium size, richly tinted foliage in autumn like the leaves of a Maple. Can be grown in a small garden.

NEW RED LEAF PEACH

The Sensational New Ornamental

Something entirely new in an ornamental. Bright red foliage appears early in the spring, changing gradually to deep maroon towards fall. Deep rose blossoms contrast beautifully with the colorful foliage. This sensational tree produces a full crop of small perfectly round Peaches, about 1½ inches in diameter. They are especially fine for pickling—flesh is white and has a delicious sweet flavor. Fruits have an over-all red color slightly spotted, and ripen quite late. A planting of these trees will provide year-around interest and pleasure.

NECTARINES —A Great Delicacy

SURE CROP. The tree is vigorous and productive. The fruits are large, roundish, white, and overlaid with very attractive red. The flesh is firm, tender, free from the stone, and very pleasing in flavor.

GARDEN STATE. (U. S. Plant Patent 92.) A large, firm, yellow-fleshed freestone of high quality, ripening with the Golden-east Peach. It is very desirable for slicing, canning, and freezing.

2-3 ft.—
each \$1.45;
3 for \$3.60.

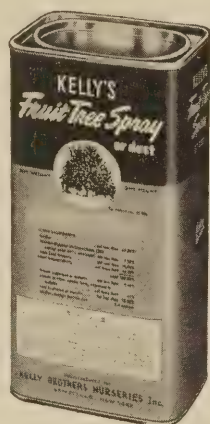

3-4 ft.—

The Champion Model No. 1 All-Brass Sprayer is an outstanding value because in one unit it combines unusual power, simple operation, effective control, continuous agitation and long life. It is a quality sprayer through and through—guaranteed against defective materials for one year. 5-gal. capacity.

Kelly's

Heavy Bearing Bush Berries

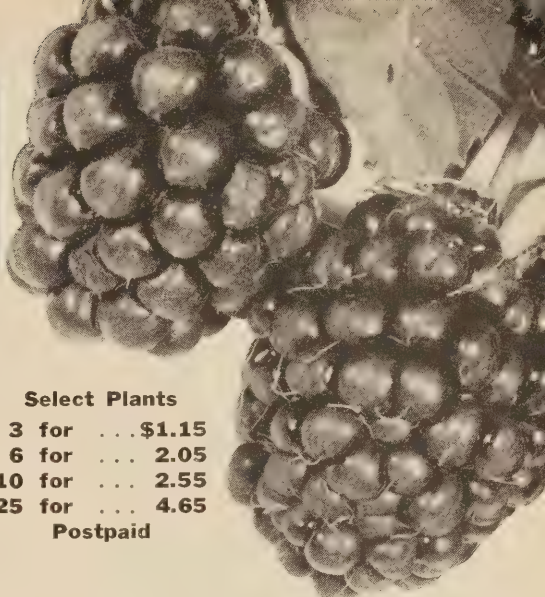

Thornless Boysenberries

Giant Size—Delicious Flavor

Canes smooth as velvet. Ripens 10 days to 2 weeks earlier than the common Boysenberry. The thornless strain retains all the good characteristics of its parent, including its rugged, thrifty growth. You will enjoy picking these large, juicy berries without a chance of scratching your hands.

Lucretia Dewberries

Of the Blackberry type, but produced on a trailing vine instead of an upright bush. The fruit is earlier, larger, attractive black, firm, and of excellent quality. Plants are disease resistant. **1-yr., No. 1 plants, 6 for \$1.20; 10 for \$1.50; 25 for \$2.75, postpaid.**

Gooseberries

Strong Grower . . . Delicious Fruit

DOWNING. A medium size, whitish green Gooseberry of good quality. Strong, upright grower and quite prolific; midseason. July 10 to 15.

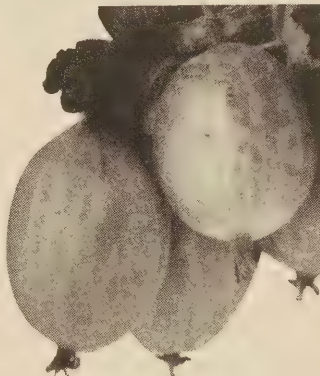

POORMAN. Largest fruit of the American Gooseberries. Attractive red. Prefers heavy soil. Bush very vigorous. Highest quality of any Gooseberry.

Selected, 2-yr. plants, each 95c; 2 for \$1.80, postpaid.

Currants

RED LAKE. The new, giant red Currant. A pleasure to pick. Berries are large, dark red in color, and on long, well-filled branches. Very hardy. Ripens over a long season. Long stems make picking easy. **Select, No. 1 plants, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

WILDER. Unsurpassed commercial sort. Bunches and berries very large, bright, attractive red, of excellent quality. **Strong, 2-yr. bushes, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

NUT TREES that Supply "Eats" as well as Shade

BUTTERNUT

A fast growing tree that bears within 2 to 3 years after planting. Nuts are large, with sweet, oily, nutritious kernels. Wonderful for nut cookies and cake, and those long winter evenings.

Postpaid

Each

2-3 ft. trees	\$1.50
3-4 ft. trees	2.50

English Walnuts

Very Meaty and Thin Shelled

A fine, lofty growing tree, producing large crops of thin shelled, delicious nuts. Makes a desirable shade tree. Not hardy in colder sections except where planted in sheltered location.

3-4 ft. trees, \$2.50 each, postpaid.

● **Important:** When ordering Gooseberry or Currant plants, it is necessary to have the following information:

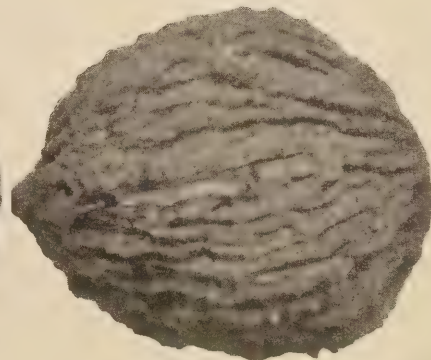

1. County and Township where planting is to be made.
2. Approximate distance from nearest stand of White Pine (Five-Needled Pine.)

If you do not receive the Currants or Gooseberries with your order, you will know we are holding them for the permit. If the permit is not granted, refund will be made.

THOMAS GRAFTED BLACK WALNUT

Grows in all states. Produces larger, better flavored kernels. Thomas is fast growing and produces very large nuts. The tree often bears fruit the second year after planting. A mature tree will produce from 12-36 bus. of giant nuts. Tree grows 25-40 ft. tall and should be planted 40 ft. apart.

3-4 ft. trees, \$2.75 each; 2 for \$5.00, postpaid.

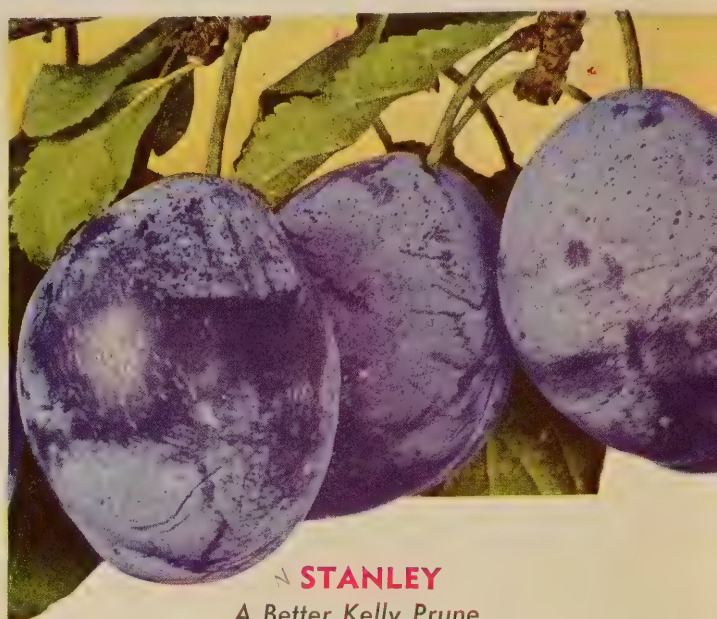

PLUM and PRUNE TREES *for Early Crops*

BRADSHAW PLUM

A very large and fine early Plum. Attractive, dark violet skin with yellow flesh. Very juicy; excellent for dessert use and for canning. The tree is hardy, and a vigorous grower. Especially desirable because of its ability to produce heavy crops of delicious fruit annually. Bradshaw is recommended for the home orchard as well as for the commercial grower. September 5-10.

STANLEY A Better Kelly Prune

The best for commercial planting or home use. Bears fruit in 3 years and ripens 10 days earlier than other varieties. Exceptionally productive. Fruit large, deep bluish purple, firm and sweet; of excellent flavor. Introduced by the New York State Experiment Station, and is becoming a valuable commercial variety. Bears annually. Midseason. Sept. 20-25. Same price as other Prune trees.

SHIRO PLUM A Golden Yellow Winner

A very early Plum. Beautiful golden yellow variety. Tree is low growing, hardy, very prolific. Excellent for cooking, canning and dessert use. People who like Plums, should be sure to plant this variety. Ripens Aug. 8-15.

DAMSON

Fruit is medium size, dark purple, produced in thick clusters. Good to eat out of hand when fully ripe or after a light frost. One of the best of its kind for culinary purposes. Tree a good grower and very productive. September 24-28.

ABUNDANCE PLUM

Trees are adaptable to wide range of soils and climates, and bear not only heavily but yearly. Fruit large, very early, amber turning to a rich, bright cherry. Flesh light yellow, very juicy and tender. Freestone. Good for canning. Should be picked when not quite ripe, as it keeps better and taste develops better. August 15-20.

BURBANK. Fruit very large, bright reddish purple. Meaty and quite firm. Should be picked before entirely ripe. Best colored fruit attained when thinned on the trees. Trees are low growing, flat-topped with somewhat drooping branches. Productive and vigorous. Good shipper. Aug. 25-30.

FELLEMBERG PRUNE. Also known as **Italian** and **German**. Widely known and valuable Plum for dessert, but most esteemed for market and drying for preserving. Fruit is long, oval, purple with a thick bloom. Flesh firm, sweet and pleasant, separating freely from stone. Moderate growth. A great favorite and there is always a good market for them at profitable prices. September 24-26.

SANTA ROSA. A very promising Oriental variety. Fruit is handsome, dark reddish purple. Large with very juicy, red flesh of good quality. Tree is large, vigorous and moderately productive. Aug. 20-26.

POLLINATION

With the exception of the Prunes, Fellemberg, German, Stanley, etc., which are self-fruitful, Plums should be interplanted to insure a set of fruit—European varieties for pollinating that class and Oriental sorts for those varieties.

Abundance, Burbank and **Santa Rosa** are Oriental varieties, balance are European varieties.

REINE CLAUDE or BAVAY'S GREEN GAGE

Has beautiful fruit, large, pale yellow, marked with red if the crop is thinned and sufficiently exposed to the sun. Trees attain only moderate size in the orchard, are productive and bear regularly. Deserves a place in the home orchard. September 25-30.

The Best Apple Trees
are Grown in Dansville

CORTLAND

YELLOW DELICIOUS

RED DELICIOUS

Amherst, Mass.,
August 19, 1952.

All of the Apple, Pear, Plum, Sweet Cherry, and 2-yr. Sour Cherry varieties propagated and now growing in the nurseries of Kelly Brothers Nurseries, Inc., Dansville, New York, have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row. A. P. FRENCH.

RED ROME

APPLES Hardy Northern Grafting Trees for Prolific Crops of Quality Fruits

6 GOOD APPLES

In Color on Page 23

CORTLAND. An Apple of the McIntosh type that combines the high quality and flavor of the McIntosh, and tendency to hang to the tree of the Ben Davis. The fruit of Cortland is larger than that of McIntosh, round in shape. Color bright red, splashed with carmine and overlaid with purplish bloom. October-February.

DAVEY. Plant Pat. 906. A McIntosh seedling from the orchard of S. L. Davenport, North Grafton, Mass. Thoroughly tested, we can recommend it. Bears early and annually. Resistant to scab. Blossoms with McIntosh, matures with Baldwin. Distinct flavor of its own. Texture resembles Wealthy. Size and shape similar to McIntosh. Easy to handle, good shipper. **Price: 2-yr. trees, \$1.50 each; 3 for \$4.00; 10 for \$12.50.**

DOUBLE RED DELICIOUS. A large, dark red Apple, with crisp, fine-grained flesh of excellent quality and flavor; a splendid keeper and shipper. Tree one of the hardiest. A regular annual bearer. Excellent for eating and the most popular fruitstand Apple. Nov.-March.

YELLOW DELICIOUS. A bright, golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily. October to April.

RED MCINTOSH. (Rogers Solid-Red Strain.) Without doubt the leading commercial variety of New York and the New England States. A very attractive red Apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy and refreshing, with attractive flavor. October-January.

RED ROME. Red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. December-May.

GENERAL LIST OF APPLE TREES

Summer Apples

Months listed after description indicate the time at which the fruit is at its best for general use. Dates indicate time of ripening.

RED DUCHESS. A solid red strain of the old Duchess of Oldenburg. One of the hardiest varieties grown. Fruit is large, striped red in color. A good early eating Apple. Vigorous grower. Regular and prolific bearer. Excellent for pies and sauces. August 5-10.

LODI. A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. August 10-15.

MILTON. Bright pinkish red, large, flesh tender, very white and a refreshing aroma. An early and annual bearer. Excellent for home and roadside markets. September 15-20.

RED GRAVENSTEIN. New red sport, much more attractive than its parent. Differs from old Gravenstein, being solid dark red in color, is a better keeper and hangs better on the tree. September 10-15.

RED ASTRACHAN. One of the best summer varieties, as it becomes fully ripe and ready for home use from late July to August. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good though rather acid. Tree medium size, yielding good crops. August 2-6.

Apple Tree Prices (Except as noted)

	1-6	6-12	12-25	25-50
	Each	Each	Each	Each
2-yr., 5-6 ft.	\$1.05	\$1.75	\$1.55	\$1.25

Commercial growers interested in 50 or more trees, please write for Commercial Price List. To insure cross-pollination be sure to plant two of Apples.

7 Apples

EARLY MCINTOSH. For home orchard or commercial use this is the ideal early variety. Resembles its McIntosh parent with its handsome red and white uniform, round shape. The tree is a vigorous grower, highly productive. Tends to be a biennial bearer, although for early crops early thinning is recommended. It comes into bearing at an early age. The flesh is white, tender and juicy with fine flavor. August 15-25.

WEALTHY. Beautiful, medium sized, brilliant red Apple; fine quality. Owing to hardiness of the tree, its adaptability to cold climates and early bearing habits, can be profitably planted as a filler. September 15-20.

YELLOW TRANSPARENT. Fruit of good size; skin clear white turning to pale yellow. Acid and very good, making it excellent for cooking. Begins to ripen some time in July and continues for 3 or 4 weeks. A very early and abundant bearer. August 3-7.

Winter Apples

Months listed after descriptions indicate the time at which the fruit is at its best for general use.

BALDWIN. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking Apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy and rich. December-March.

MACOUN. A late McIntosh type Apple ripening about 10 days later than McIntosh. Dark red with whitish, close-grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by N. Y. Experiment Station. November.

MONROE. A Grand New Apple from the N. Y. Experiment Station. Named and introduced for trial in 1949. Tree upright-spreading, vigorous and an annual bearer. Fruit large, roundish conic; color similar to Jonathan, its maternal parent. Flesh yellowish, crisp, juicy and mildly sub-acid; quality good. Winter Apple that offers possibilities for dessert and culinary uses. Supply limited—order today. **1-yr. trees, \$1.50 each; 3 for \$4.25; 10 for \$12.50.**

NORTHERN SPY. Easily ranks among the very best winter Apples. Fruit is large, very attractive, being of bright red color with a pronounced bloom. Flesh is juicy, crisp and excellent for dessert or culinary purposes. Keeps well in storage until April or later. November-April.

RED SPY. A new red sport identical with Northern Spy, except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. November-May.

RHODE ISLAND GREENING. As a cooking Apple it is unsurpassed, and as a dessert fruit of its season, has few equals. It is a good keeper but keeps better if picked early. This Greening is a beautiful yellow color when ripe and an abundant yielder. December-April.

ROME BEAUTY. Yellow- and red-striped Apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pennsylvania, and West Virginia. December-May.

STAYMAN. Comes into bearing young. A reliable cropper. Medium to large size fruit. Slightly striped. Coloring to dull red. December-March.

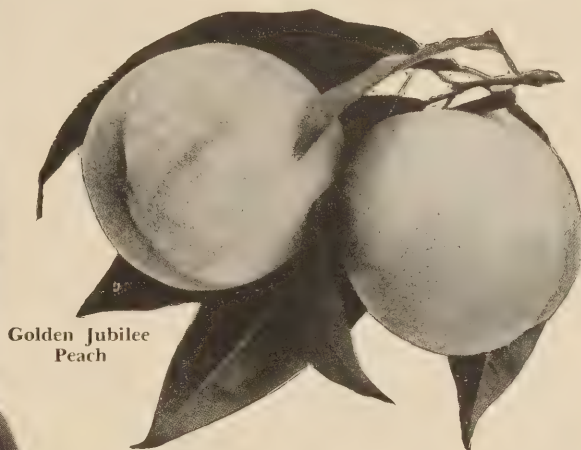

YELLOW DELICIOUS. See illustration, page 23, and description, above.

*Kelly's
Famous*

BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and is adaptable to all different climates; soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Sept.-Oct. (Sept. 1st-10th.)

Pollination

Two varieties are needed. The only combination that is cross-in-compatible is Seckel and Bartlett. A third variety is needed with the above two.

CLAPP'S FAVORITE

Precedes Bartlett, which it resembles in size, shape, color and flavor. It is the first Pear on the market. Large, pale lemon-yellow fruit with brown dots. Fine texture, juicy, buttery, with a rich, sweet, delicate vinous flavor. Tree hardy and productive. Thrives where other varieties fail. August 15-20.

BOSC - Quality Pear

A Pear which is rated by all as "very good" or "best." Has a long, tapering neck and a long stem which allows it to sway in heavy winds without dropping. Brownish yellow in color. Flesh is tender, buttery, very juicy, with a rich flavor and pleasing aroma. The tree is a slow grower, but most productive. Oct. to Jan. (Sept. 25-30.)

SECKEL

The Pear to plant for eating fresh and pickling. Medium size, skin rich yellowish brown with deep, brownish red cheek when fully ripe. Flesh very fine grained, juicy, sweet and good. Trees resistant to blight, very productive and hardy. Should be planted in fertile soils, not heavy clay. September and October. (September 20-25.)

Other Selected PEARS - Not Illustrated - All Kelly Grown Trees

ANJOU

This is one of the best late fall and early winter varieties for the market, its season lasting until way into January, even in common storage. Large fruit, green in color, but turning to yellow when ripe, dotted with russet. The yellowish white flesh is firm, but tender, very juicy, sweet, spicy, with a rich, vinous flavor. Trees hardy and vigorous growers, come into bearing early. October to January. (September 25.)

DUCHESSE D'ANGOULEME

The fruits excite admiration and wonder by their enormous size. Always known by this characteristic. All dull, greenish yellow spotted russet. Trees are vigorous, hardy and healthy. Is a particularly desirable sort for the Pear fancier. November to December. (September 25-30.)

GORHAM

A seedling of Bartlett and closely resembles its parent in all characteristics and ripens from 3 weeks to a month later. It rivals Bartlett in all good qualities, being as large and handsome and as good or better to eat or to can. Fine canner—introduced by the New York State Experiment Station. (September 10-25.)

KIEFFER

Large fruit, rich yellow in color, with red cheek. Very juicy. Good for canning, which brings out its flavor. Trees vigorous, fruitful, and are least susceptible to blight. November to February. (October 1-10.)

SHELDON

The fruits please both the eye and palate. It is distinctive in its russeted skin with a ruddy cheek. Flesh is juicy and deserves to be called luscious. Flavor is sweet, vinous and highly perfumed. Keeps well and ships well. Trees are vigorous and hardy. October. (September 20.)

TYSON

The Home Orchardist's First Choice

The quality of this old favorite is far superior to that of commonly grown Pears. The tree is a thrifty grower and very hardy—fruit is medium size, juicy with a spicy, scented sweetness that gives the fruit the charm of individuality. (Ripens late in August.)

DOLGO CRAB

A handsome Red Crab Apple. This is an especially valuable tree because it is equally attractive when in flower or when laden with its abundant brilliant red fruits. Very juicy, jellies easily, and makes a rich, ruby-red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. Ripens Sept. **3-4 ft., each \$2.00; 3 for \$5.75; 10 for \$15.00.** **4-5 ft., each \$2.25; 3 for \$5.95; 10 for \$17.50.**

Kelly's Famous ORANGE QUINCE

FOR DELICIOUS JELLY

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, the farmer or any one having a small garden. The Quince tree does not take much room on account of its dwarfish character. It can be grown in bush or tree form. Fruit is large golden yellow and of excellent quality. Makes delicious jells. Ripens early in September. Grows 10 to 15 feet tall. Produces abundantly.

Commercial growers interested in 50 or more trees, please write for our Commercial Price List.

Many people often ask which varieties we would suggest for planting. We highly recommend Windsor, Emperor Francis, Napoleon, and Schmidt's Bigarreau. Each one pollinates the other—any combination of two or more gives desired results.

↘ BLACK GIANT

Was introduced by Luther Burbank in 1914. Tree is large, vigorous, very productive. Cherries are attractive in size and color; the crop is late, coming in season just before Lambert, which the black fruits resemble. Quality is excellent and less subject to cracking than Bing. One of Burbank's most notable productions.

↘ EMPEROR FRANCIS

The Queen of All Sweet Cherries

Recognized as one of the newer leading sweet Cherries for home and commercial orchards. This high quality Cherry resembles Napoleon in size and color except that it becomes a little darker. Ripens around July 4th. Sold at same prices as regular varieties.

Pollination

Sweet Cherries are self-unfruitful, so must be interplanted. Where Napoleon, Bing and Lambert are to be planted together, another variety, such as Windsor or Black Tartarian must be added, as the first three will not pollinate each other. The Sour varieties are self-fruitful.

2 NOVELTIES

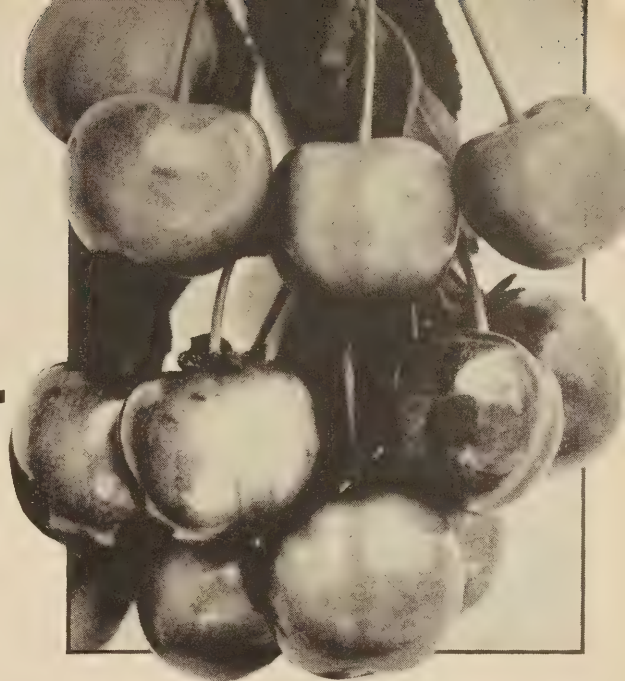

KELLY'S BEACH PLUM

(*Prunus maritima*)

Ideal as a shrub—also produces delicious fruits. Bears first or second year after planting. Grows 6 to 8 feet at maturity. Hardy; does well in poor soil. Beautiful white blooms late in the spring before the leaves appear. Purple fruit, ripe in September, makes excellent jelly. **Selected plants, \$1.95 each, postpaid.**

↘ HANSEN IMPROVED BUSH CHERRY

An ornamental shrub, producing fruit. Very easy to grow, highly productive and hardy. The fruit is large and black. Leaves silvery green, turning red in autumn. Attractive white blossoms add to landscape effect. Dwarf growing, 4 to 5 feet tall. Can be kept trimmed. Best to plant two or more bushes for better fruit production. **3-year-old, bearing size, 2 for \$1.45, postpaid.** See page 31 for color illustration.

Commercial growers interested in 50 or more trees, please write for our Commercial Price List.

↘ EARLY RICHMOND

Fruit small but good and the earliest of the sour. Unsurpassed for cooking purposes. This is the variety that yields such marvelous crops in the home gardens. **Most hardy of all varieties.** Uninjured by the coldest winters. Tree slender in growth, with a roundish, spreading habit. Ripens June 25-30.

↘ ENGLISH MORELLO

Fruit is handsome in appearance, real tart. Is recognized as the **standard late sour Cherry**, taking the place of Montmorency after its season is over. Cooking gives the fruit a rich, dark wine color, very attractive in appearance and a pleasant, aromatic flavor. Tree is small, upright spreading with drooping branches. Ripens July 20-30.

ALL KELLY CHERRY TREES are shipped with a New York State Dept. of Agriculture Certificate, certifying that our trees are budded from healthy trees and guaranteed to be virus free.

See page 30 for Cherries in color.

MONTMORENCY

America's Famous "SOUR" Cherry

Always in demand by the home canner as well as the canning factories where they are canned by hundreds of tons. The trees are good bearers and the fruit ships well and appeals to the human eye for color as it is a bright clear red. Is good sized and has a fine flavor. Can be eaten right off the tree and makes excellent pies and other desserts. A variety that is hard to beat from any angle. Ripens about July 15.

BLACK TARTARIAN

Sweet

Well known and popular sweet Cherry; very large, bright purplish black, juicy, and has a rich flavor. Excellent for canning and a good shipper. Trees are remarkably vigorous and erect growers, produce immense crops. Ripening date June 20-July 4.

SCHMIDT'S BIGARREAU - Sweet

A midseason black sweet Cherry. Considered one of the best large varieties of its season. Delicious to eat fresh and canned, and very attractive. Fruit grows in clusters. Keeps well and is an excellent shipper. In size it is usually unsurpassed by any black Cherry in the East. Ripens around July 10.

NAPOLEON CHERRY

Sweet White Oxheart

This is a choice sweet, yellow Cherry of the highest quality, known as the White Oxheart. Good for market and canning. Pale yellow with attractive bright red cheek; flesh firm, flavor rich and sweet. Fruit keeps well so fruit dealers like it for the market. Trees productive and come into bearing early. Ripening date July 7-10.

WINDSOR

Sweet Black Oxheart

One of the best quality dark Cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good commercial variety. Ripening date July 20-26.

Fresh Cut, Home Grown

ASPARAGUS

Has No Equal For Flavor

You'll be surprised how easy it is to grow Asparagus sufficient for a family of four or five. It is very healthful, rich in minerals and vitamins. Every garden should have some. Protect your family's health and enjoy this tender, delicious vegetable. Room required is very small. Complete planting and cultural directions sent free with each order.

MARY WASHINGTON.

The Outstanding Variety. This is, without doubt, the best variety at this time. It is a very strong grower, stalk giant size, green color, rich and tender. In addition to being very productive it is rust-resistant and a bed will last for years.

RHUBARB—Choice

MacDONALD. New Red Rhubarb. Introduced by MacDonald College, Quebec, Canada. Considered the finest of all Rhubarb. A heavy producer. Giant size stalks, 18 to 24 inches long, 2 to 3 times larger than the common Rhubarb. Sweeter and more tender. Use it all spring and most of the summer. Its red skin and white flesh make the finest looking and best tasting Rhubarb sauce and pie you ever ate. Practically seedless, grown only from divisions. **75c each; 3 for \$2.00; 10 for \$6.00, postpaid.**

CANADA RED. The reddest of all Rhubarbs and a runner-up in taste appeal to Valentine. Has large, tender, juicy stalks that are rich red all the way to the heart and even to the mid-ribs in the leaves. Skin so tender you need not peel it. **Canada Red**, a heavy producer, can be used throughout the season. Plant now and have Rhubarb this year. **\$1.00 each; 2 for \$1.85; 6 for \$4.85, postpaid.**

Fruits on This Branch are Actual Size

HANSEN Bush Cherries

A Kelly Recommendation

An ornamental shrub, producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and wonderful to eat right from the bush. Leaves are silvery green, turning red in autumn. Attractive

white blossoms add to landscape effect. Dwarf growing, 4 to 5 feet tall. Can be kept trimmed. Best to plant two or more bushes for pollination. **2 for \$1.45, postpaid.**

HARDY, BLIGHT RESISTANT

These new blight resistant trees will bear nuts two years after planting. They are a fast growing tree and an ideal plant to take the place of the old-fashioned American Chestnut that we all remember from our childhood days. The fruit is fully as delicious as the native American Chestnut and slightly larger in size. Grows to 35 ft. tall. Best crops are insured by planting two or more trees for pollination.

Prof. George L. Slate

HELPFUL HINTS ON SMALL FRUIT GROWING Prof. George L. Slate

New York State Experiment Station, Geneva, N. Y.

RASPBERRIES and BLACKBERRIES

(See pages 39 and 40.)

Raspberries and Blackberries are easily grown fruits if their cultural requirements are met. An open, airy situation is best and the plants should be away from the root competition and shade of tall trees, but may be grown among the smaller fruit trees in the home garden. Most good farm and garden soils

are suitable if not very heavy or very light, and are well drained so that water does not stand on or near the surface more than a few hours during the growing season. Keep black and purple Raspberries off the ground that has grown Tomatoes, Peppers, Eggplants or Potatoes the past two or three years. Get rid of old run-out Raspberries nearby to prevent disease spreading into the new planting.

Preparing the Soil

Fit the land thoroughly as for vegetables—plowing under a green crop or stable manure if the soil has been under constant cultivation. Red Raspberries and Blackberries may be planted in late fall or early spring, but fall planted plants should be mounded up to prevent them from heaving out during the winter. Tip plants of black and purple Raspberries should be planted in the spring. Space Raspberries in home garden 7 feet between rows and 2 feet between red Raspberries in the row, and 3 feet between black and purple varieties in the row. Set the plants the same depth they grew previously and be sure the soil is packed tightly so that the plant will resist a strong tug without loosening.

Cultivation

Weeds must be kept down by cultivation or mulching. Cultivation should be shallow and frequent enough to keep down weeds. Mulching is especially valuable in dry seasons. Straw, spoiled hay, weeds, lawn clippings, peat and sawdust are all suitable. When sawdust is used an extra feeding with a nitrogenous fertilizer is advisable. Cultivation should be discontinued after the crop is off or about August first and the weeds allowed to grow or buckwheat may be sown between the rows to check cane growth and harden the plants off for winter.

Fertilization

For fertilizers after the first year any of the following materials may be applied in early spring:

- Nitrate of Soda, $\frac{1}{4}$ lb. per 100 sq. ft.
- Ammonium Nitrate, $\frac{3}{4}$ lb. per 100 sq. ft.
- Stable Manure, 3 bus. per 100 sq. ft.
- Poultry Manure, 1 bu. per 100 sq. ft.

On soils low in fertility, especially sands or gravels, or eroded soils, supplement the nitrates with a 10-10-10 fertilizer at the rate of 1 lb. to 100 sq. ft. If new growth is too rank and winter kills, reduce or discontinue the manure until lessened growth indicates its need.

Red Raspberries and Blackberries produce many suckers which must be kept within bounds. When cultivating or hoeing, restrict the row to one foot in width by removing all suckers coming up between the rows.

Raspberries and Blackberries must be pruned each year. The canes are biennial; they grow one season, bear fruit the second season and then die. After the crop is harvested the canes which bore it are cut out, leaving behind the current season canes to fruit the following year. In the spring the red Raspberry canes are cut back to a height of 4 to 5 feet, depending on the variety, and the weaker canes removed, leaving the canes spaced about 6 inches apart in a row a foot wide. Black and purple Raspberries are treated in a different manner. In June when the new shoots of black Raspberries are 18 to 24 inches high they are pinched off to induce branching. Purple Raspberries are pinched 6 inches higher. Blackberries are pinched at 3 feet. Do this as soon as the required height is reached in early June. The following spring cut the branches back to 8 to 10 inches for the black Raspberries, 10 to 15 inches for the purple Raspberries, and 15 to 18 inches for the Blackberries.

Fall bearing red Raspberries, such as Indian Summer, are pruned the same as other red Raspberries.

Blackberries that bloom, but produce no fruit or only poorly developed berries, should be sprayed just before the bloom with DDT at the rate of one pound of actual DDT to 100 gallons of water.

STRAWBERRIES

(See pages 42 and 43.)

Strawberries are one of the best home garden fruits, being valuable for dessert, freezing and jam, and unusually high in Vitamin C, outranking even the citrus fruits in that respect.

Location of Bed

The site should be sunny, away from the shade and roots of large trees, although interplanting among young fruit trees is satisfactory. The soil should be fertile, well drained and free from quack grass and other perennial weeds. Soils that will grow good vegetables are suitable for Strawberries, but the berries should not be planted where Tomatoes, Peppers, Eggplants or Potatoes have been grown for several years, as these may infect the soil with a wilt disease that is destructive to Strawberries. Keep the Strawberries a few feet away from the place where these vegetables have been grown. Grass sods may have white grubs and should be avoided until they have been cultivated two years. Manure or ploughing under a legume sod is good preparation.

Planting Time

Early spring, not August, is the time to set Strawberries. Space the plants 18 to 24 inches apart in rows $3\frac{1}{2}$ feet apart. The crown or solid center of the plant should be set even with the surface of the ground and the soil firmed so tightly against the roots by pressure of the foot that the plant will resist a strong tug without loosening. After the runners form, space them around the mother plants so that they are about 6 inches from each other and the row is 18 inches wide. Remove as weeds runners coming after the row is filled out. The first runners are the most productive.

Fertilizing

Manure at the rate of 3 to 6 bushels to 100 square feet at the time the ground is fitted will provide adequate fertility. Lacking manure, a 10-10-10 fertilizer may be worked in before planting, or applied as a side dressing at the first hoeing. A pound to 100 square feet is about right.

A nitrogenous fertilizer such as nitrate of soda, $\frac{1}{2}$ pound to 100 square feet, or ammonium nitrate at half that rate may be broadcast over the plants in late August when the foliage is dry, and immediately brushed off with a broom or piece of brush. Fertilizer should not be applied to the bed in the spring of the fruiting year.

Keep weeds out of the bed at all times, and the soil mellow to facilitate the rooting of runners.

Winter Protection

In the fall, usually about mid-November and before temperatures get below 18-20° F. above zero, the plants should be mulched with straw to a depth of about 3 inches. In the spring, early April, just as the new leaves are starting from the crown, remove part of the straw to the space between the rows, leaving a thin covering over the plants for the leaves and blossoms to grow through and the fruit to rest on later.

Weed the bed about blossoming time if necessary. Do not fertilize the bed in the spring of the bearing year unless the soil is very poor, or the bed has not been mulched.

If the rainfall is less than one inch a week, irrigation may increase the crop. Apply enough water to equal an inch of rain per week. Over-watering may cause rotting of the berries.

GRAPES

(See pages 35 and 36)

Grapes should be grown in an open, airy situation to lessen injury from fungous diseases. Slopes are preferable as frosts are later than in low spots. Late varieties ripen better on the south side of a building or solid fence. The soil must be well drained.

Planting

Either one- or two-year plants are suitable and may be set either in the fall or spring, but fall-set plants should be mounded up the first winter. Space vines 8 feet apart. Vines may be trained to arbors, porches or a trellis of two wires, one 2½ feet above the ground, the upper 2 feet above the lower. Posts about 25 feet apart with end posts braced.

Training

With Kniffin system of training the vine has a trunk to top wire and an arm in each direction on both wires. Newly set vines are cut back to one or two buds. New shoot is staked up to form a trunk and when it reaches top wire is pinched off and laterals led out, one along each top wire. The next year two laterals are led along the lower wires, the other being rubbed off. Thereafter, at the annual pruning in the spring leave a strong lateral along each wire and remove other canes. Laterals should have 6 to 10 buds each. Leave more buds on vigorous vines, fewer on weak vines. If vigorous vines bloom well but set light crops, leave more buds next year. If vines overload and fruit fails to ripen well leave fewer buds next year. Grapes should not be summer pruned.

Fertilize with ammonium nitrate or nitrate of soda at rate of one-fourth to one-half pound per vine or stable manure. Strong growing vines do not need fertilizing. Keep down weeds until August with cultivation or mulch.

RHUBARB

(See page 31)

Rhubarb is highly prized for sauce and pies in the spring before other fruits and vegetables are ready. Rich soils are essential and a heavy application of manure should be made in advance of planting. An annual application of manure, or commercial fertilizer, is desirable. Use the manure at the rate of 3 to 6 bushels to 100 square feet, or 10-10-10 fertilizer plus 1 pound of nitrate of soda, or one-half pound of ammonium nitrate for the same area. Plant the roots in early spring 3 to 4 inches deep and 3 feet apart in the row, and at one side of the garden as they last for many years. Clean cultivate or mulch, as vigorous growth means high yields and tender stalks. Pull only a few stalks the second year, but thereafter a full crop may be harvested for about two months each spring.

Early Rhubarb may be had by covering a hill with a sash over a box just before growth starts. Rhubarb may be forced in a box of soil in the cellar during the winter if the roots are brought in after experiencing a hard freeze.

CURRENTS and GOOSEBERRIES

(See page 21)

Currents and Gooseberries are both valuable home garden fruits that should be grown much more than at present. Both yield heavy crops annually and have many uses in the kitchen. They will grow in the sun or in the shade of the north side of a building or fence and may be successfully interplanted between young fruit trees or grape vines.

Well drained fertile soils, preferably rather heavy in texture, are best, but the lighter types will do if heavily fertilized and mulched in time of drought. They may be planted in late fall or early spring, and spaced 5 feet apart in the row. At planting time cut the canes back to 6 or 8 inches. Cultivate shallowly, or mulch to keep down weeds.

Straw manure may be applied to a depth of 2 or 3 inches to provide fertility and act as a mulch. If manure is not available, apply about 4 ounces of nitrate of soda or 2 ounces of ammonium nitrate per plant in early spring, but not applying any the year the plants are set. On light soils a complete fertilizer may be needed in addition to the above, in which case use one-half pound of 5-10-5 formula to each plant.

Currents and Gooseberries in good vigor produce so many canes that the bushes soon become too crowded. Pruning consists of removing all canes over three years old and thinning out the weaker remaining canes so that the pruned bush consists of 9 to 10 canes evenly divided between 1, 2 and 3 year-old wood.

Currents for jelly should be picked before fully ripe as there is more pectin at that time. Gooseberries make an excellent jam and jelly and may be used green for pies and sauce when two-thirds grown.

ASPARAGUS

(See page 31)

Asparagus is an easily grown perennial that is ready to use in early spring. The beds last 15 to 20 years and should be set at one side of the garden. Set one-year-old roots 18 inches apart in a trench 4 to 6 inches deep and 4 feet apart if more than one row. Cover the roots at first with only two inches of soil, filling in gradually when cultivating. Begin cutting the third season and cut for one month. In the following years the bed may be cut for two months. Fertilize with a complete fertilizer and control weeds. If beetles feed on foliage dust with rotenone.

BLUEBERRIES

(See page 34)

Blueberries are a valuable home garden and commercial fruit and deserve a place in every home garden with soils that are acid, or can be made acid. Clay soils are not suitable for Blueberries.

Acid Soil Required

Acid soils are essential for Blueberries. If in doubt, have the soil tested by the Farm Bureau, and if the pH is under 5.5, Blueberries may be planted. If over 5.0, spade in aluminum sulphate as follows to each 100 sq. ft. Aluminum sulphate listed on page 20.

If present pH on your soil is	To change to pH of 4.5 use:	
	On sandy soils	On loam soils
5.0	2.4 lbs.	7.2 lbs.
5.5	4.8 lbs.	8.3 lbs.
6.0	7.2 lbs.	21.0 lbs.
6.5	9.0 lbs.	27.6 lbs.
7.0	11.4 lbs.	34.8 lbs.

Location

Blueberries grow much better and on drier sites when mulched than when cultivated. Sawdust of any kind and age is ideal mulching material, but pea and other materials except legumes, will do. Twice as much nitrogen is necessary during the first few years of a sawdust mulch.

Fertilization

Sulphate of ammonia is the best material for fertilizing Blueberries. Beginning with the second spring after planting, apply it at the rate of 2 ounces per plant, doubling this if a sawdust mulch is used. Scatter the fertilizer over the surface of the ground from one-half to three feet from the center of the bush. Increase the application two ounces each year until mature plants five or six years old are receiving three-quarters of a pound per year.

Pruning

Pruning is necessary after the third year to prevent overbearing and to maintain berry size. Remove low-spreading branches near the ground, at least one old cane each year, and remove the weaker new canes, leaving two or three of the stronger to gradually renew the bushes.

A few bushes near buildings may need a cheesecloth cover to prevent birds from taking the berries.

Kelly's

GIANT HYBRID

Blueberries

*Make Most
Delicious Pies*

Enjoy luscious, juicy, giant Blueberries right from your own bushes. These mouth-watering beauties are as big as Grapes. Delicious for pies, easy to preserve, fine for freezing. Bushes are trim and very ornamental planted in borders or beds.

Complete planting and after care instructions sent with each order.

- ★ **CONCORD.** (Early to Midseason.) Excellent producer and prolific grower. Upright plant. Excellent flavor and size.
- ★ **JERSEY.** (Late.) Tall, well-shaped bush. Attractive appearance. An excellent producer. Large, good quality berry.
- ★ **RANCOCAS.** (Midseason.) Popular. Ripens about 2 weeks after Cabot. The bush is tall, vigorous and productive.
- ★ **STANLEY.** (Late.) Plants tall, vigorous, with large thick, shiny leaves and very productive. Fruit large, perfumed, and most delicious in flavor. Ripens late midseason.

Heavy-Rooted Hardy GRAPES

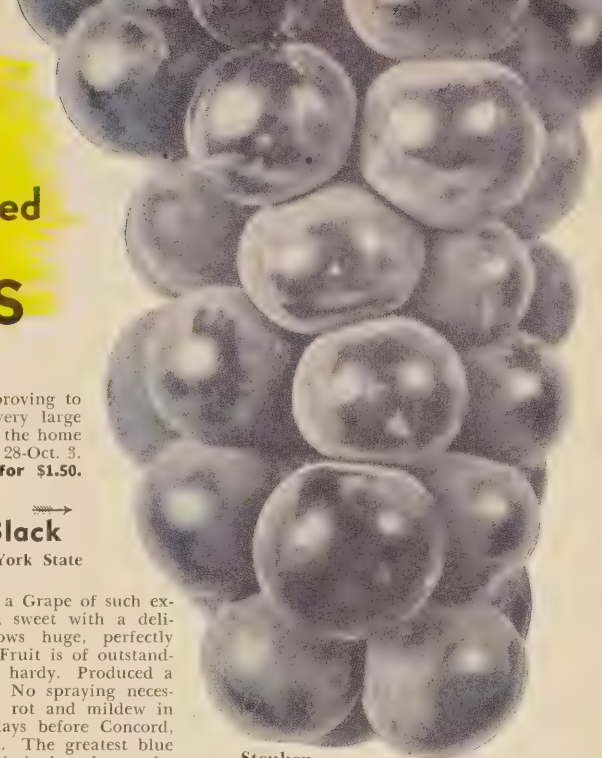

← CACO (Red)

A new red Grape which is proving to be a great favorite. Berries very large and sweet. A dandy variety for the home vineyard or Grape trellis. Sept. 28-Oct. 3. **Selected 2-yr., 55c each; 3 for \$1.50.**

→ STEUBEN, Blue-Black

A New Creation of the New York State Experimental Station

Never before have we grown a Grape of such exquisite flavor. Melting, tender, sweet with a delicate perfume-like flavor. Grows huge, perfectly formed, long slender clusters. Fruit is of outstanding quality, and the vine very hardy. Produced a full crop after 20 below zero. No spraying necessary—it is absolutely free from rot and mildew in our planting. Ripens a few days before Concord, but keeps well until Christmas. The greatest blue Grape ever grown. Supply limited—order early. **Selected 2-yr. vines: Each \$1.75; 2 for \$3.25, postpaid.**

Steuben

Concord

✓ NEW INTERLAKEN SEEDLESS

A New York State Experiment Station Introduction. The fruit ripens to a rich golden yellow with medium sized berries that are very sweet. The flesh is meaty, crisp and firm, and ripens a full month before Concord. Promises to be one of the leading Grapes in the East as it can be eaten whole like California Grapes. Ripens about August 30th. **Selected 2-yr. vines, each \$1.75; 2 for \$3.25, postpaid.**

← ✓ CONCORD (Blue)

The leading commercial Grape. Color blue-black; berries and bunches large. Hardy, productive, and an excellent shipper. Succeeds over large area. Excellent for Grape juice. September 25 to 30. **55c each; 3 for \$1.50.**

GRAPES—Selected Varieties for Flavor—Size and Yield

THE OLD FAVORITES

✓ DELAWARE (Red)

Bunches and berries small. Light red. Unusually sweet and delicious. One of the best red varieties. September 20.

✓ NIAGARA (White)

The most popular white Grape. Bunches and berries extra large. Vigorous, productive and a good keeper. September 25-30.

✓ PORTLAND (White)

Holds first place among Grapes as an early white variety. Vine is hardy, healthy and productive. Bunch and berries largest of all white Grapes. September 1-8.

THEY RIPEN QUICKLY

Kelly's Grape Vines last a lifetime. Plant our selected plants. Guaranteed to be the finest plants grown. Easy to grow, adapted for a wide range of soil and climate. Prolific bearers. Fruit ideal for dessert, jelly, jam or juice. Full planting instructions with each order.

GOLDEN MUSCAT

California Type Grape

Wonderful new golden yellow Grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine Muscat aroma of European Muscat. Vine is vigorous, productive. The clusters are very large and compact. Berries are large, juicy, sweet and tender. Oct. 5-10. **Selected, 2-yr. vines: \$1.00 each; 3 for \$2.75, postpaid.**

NEW EXTRA CHOICE GRAPES

✓ FREDONIA

A Fine Sweet Grape

The leading early black Grape. An introduction of the New York State Experiment Station. Plant is a strong, healthy grower. Clusters medium in size. Berries large and juicy. September 5-10.

✓ VAN BUREN (Black)

Best new, early Grape. Desirable for home and commercial planting. Resembles Concord, but much sweeter and very juicy. Aug. 28-Sept. 2. We highly recommend this variety. Vine is heavy producer and vigorous in growth. **Selected, 2-yr. vines: \$1.00 each; 3 for \$2.85, postpaid.**

✓ SENECA

You will be amazed at the taste of this delicious California Vinifera Grape. Tender skin which can be eaten with the berry makes Seneca a desirable dessert Grape. Vine is vigorous, hardy and productive. Berries sweet and juicy. Ripens first week in September. **Select, 2-yr. plants: \$1.00 each; 3 for \$2.75, postpaid.**

✓ Buffalo

New, early Black Grape, ripening first week in September. Desirable for dessert and wine. Vine is a vigorous grower and very prolific. You'll like these sweet, juicy Grapes. Medium to large in size. Order a vine today. Supply limited. **Selected vines: \$1.00 each; 3 for \$2.75, postpaid.**

Kelly Bros. Nurseries,
Dansville, N. Y.

R. R. 2, Beaver Dams, N. Y.,
March 25, 1952.

Gentlemen: Another spring and again the pleasure of ordering from your thoroughly reliable firm. We have never yet lost any of your nursery stock, even though we live in a frost pocket and are subject to discouraging late spring and early fall weather.

Thanking you in advance, I am,

Very truly yours,
Mrs. Cecil G. Garland

Kelly Brothers Nurseries, Inc.
Dansville, N. Y.

Brooklyn, N. Y.
2815 Cortelyan Road,
April 3, 1952.

Gentlemen:

Received replacement Peach tree today in good condition. Thank you. You are fine people to do business with. You may be sure that I will recommend you very highly. Your stock and business methods are the finest.

Yours truly,
C. H. McIntyre

The "ALL PURPOSE" HOE

A "Must" For Every Gardener
JUST WHAT YOU NEED FOR YOUR GARDEN
\$1.49, Postpaid

The goose-necked shank permits close cultivation of small plants. Weighs only 1½ lbs. but the "All Purpose" Hoe is stronger than most other hoes. Women find that they can use the "All Purpose" Hoe without fatigue. The "All Purpose" Hoe will weed and mulch between plants and in corners that no other hoe can reach. It will dig dandelions, plantain and weeds from your lawn without disfiguring it. Blade is the finest oil-tempered spring steel and has 7 inches of cutting surface. Hardwood handle is 44 inches long, finished in natural color. Shank and blade are bronze welded.

Commercial growers interested in 50 or more trees, please write for our Commercial Price List.

Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. If properly cared for the trees are sure to bring in a handsome return on your investment. Our trees are of the best quality and sure to grow.

Dates after each description indicate approximate ripening season in Western New York. Season varies in different sections of the East, but this will give you an approximate idea when to expect the fruit to be ripe.

✓ **BELLE OF GEORGIA.** Large, attractive, white-fleshed Peach. Red cheek. Hardy and productive. Freestone. September 3-7.

✓ **CHAMPION.** Large, creamy white, with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. September 5-8.

✓ **J. H. HALE.** An extra large Peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. September 17-21.

✓ **SOUTH HAVEN.** Another excellent Peach, well worth planting. Golden yellow with red blush. Large, meaty and delicious flavor. Prolific. Freestone. August 25-September 1.

✓ **SULLIVAN ELBERTA.** Midseason, ripening one week before Elberta. Fruits large. Similar to Elberta in all respects except earlier ripening. One of the most extensively planted varieties in the last few years, especially in the Southeast.

✓ **VALIANT.** Large, yellow freestone. Juicy, very good quality. Excellent producer and fine canner. Quite hardy in bud. An introduction from Canada. August 28-September 5.

✓ **VEDETTE.** Ripens a few days before Valiant and 3 weeks before Elberta. Fruit is large, roundish oval, yellow-fleshed, and a freestone. Superior quality and color. August 25-30.

✓ **VETERAN.** Large, round, yellow-fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. Hardier in bud than most varieties. Ideal for cold sections. August 30-September 4.

NEW PEACH VARIETIES

✓ **JERSEYLAND.** Very early, ripening about 5 weeks before Elberta. Fruits medium-sized, round. Skin solid red. Flesh yellow, usually free when ripe, firm. Promising for local marketing and commercial production.

✓ **FAIRHAVEN.** Early midseason, ripening after Golden Jubilee and about 3 weeks before Elberta. Flesh yellow, free. Good for freezing and canning. Promising variety for local marketing and commercial production.

✓ **SUNHIGH.** (New Jersey Introduction.) Good quality. Yellow flesh. Hardy. Ripens just ahead of Goldencrest.

✓ **SUMMERCREST.** (New Jersey Introduction.) Yellow freestone. Ripens just before Elberta.

POLLINATION: With the exception of **J. H. Hale**, all varieties we offer are self-fertile.

Kelly's Elberta

Leader of all Peaches and the greatest commercial variety on the market; 50% of the Peaches planted are Elberta. A beautiful Peach of good quality; not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow with red cheek, juicy, high flavor. Flesh yellow; freestone. September 15-20.

The New Fowler

This new Peach was first developed by Mr. George R. Fowler of Marlboro, N. Y., several years ago. Awarded Patent No. 567 in 1943. It is a large, yellow Peach of the Elberta type, very hardy.

Tree of vigorous growth and exceptionally disease-resistant. Fruit matures a week later than Elberta, ripening evenly. Firm, thick-skinned and an excellent shipper. Fine flavor and practically fuzzless. Thoroughly tested and sure to be a widely planted variety for both home orchard and commercial growing. **For prices on Fowler add 15c per tree to our Peach tree prices on page 37.**

Kelly's Hale-Haven

A marvelous Peach, a result of crossing the famous J. H. Hale with South Haven. A large, beautifully colored, yellow-fleshed Peach. Ripens approximately 10 days to 2 weeks ahead of Elberta. Perfect freestone; strong grower. Good shipper, and a prolific, heavy bearer. The tree is hardy and fruit is of the highest quality. Should be in every planting. September 1-5.

Kelly's Golden Jubilee

The Sensational Peach

We recommend this New Jersey Experiment Station introduction. It's a real money maker. Quite hardy, resists excessive cold. Sure cropper, after severe winters and heavy frosts. **Golden Jubilee** is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy and sweet. August 20-25.

Kelly's Red Haven

A new, desirable, early Peach that has been thoroughly tested and found highly satisfactory. Introduced by the South Haven Experiment Station, it has the fine flavor of the South Haven and Hale-Haven. When other early Peaches are still green, this Peach is a bright red and ready to ship before it is fully ripe. A Peach to plant for real profit. Hardy. Freestone. Self-pollenizing and a prolific yielder. August 20-25.

Raspberries

Indian Summer

INDIAN SUMMER

10 CHOICE, EVERBEARING PLANTS, \$2.75

New Red Raspberry introduced by the New York State Experiment Station. The summer crop ripens early in July; the autumn crop starts early in September and continues until a severe frost. Plant is hardy and a vigorous grower, bears heavy crops.

Latham

CUMBERLAND

THE LEADING LATE BLACKCAP

Produces large, jet-black fruit, firm and of excellent quality. Starts to ripen in midseason, continuing for several weeks. Fruit is large, plump, sweet and juicy with a true "Blackcap" flavor all its own. Free from seediness and crumbling and an ideal shipper. The most popular of all black varieties wherever Blackcaps are grown. July 5-10.

*Healthy Plants
That Will Bear
Bumper Crops*

Milton

The New MILTON

A late variety for market and home use. The berries are large, long conic, resembling those of the Taylor in size and shape. They are attractive bright red, firm, not crumbling, mild sub-acid and good. It ripens 2 or 3 days later than Taylor and Latham. The plants are vigorous, productive and hardy. Milton has remained free from mosaic, in a test planting, in the Hudson Valley, where numerous other varieties soon become infected. This freedom from mosaic is an important reason why the seedling was named and introduced for more extensive testing by growers.

Kelly Raspberries

The Productive SODUS (PURPLE)

The leading purple Raspberry. Recently introduced by the New York State Experiment Station. Berries are very large, firm, sprightly and good in quality. The plants are very vigorous, very productive, and hardy. More resistant to drought than the old Columbian and yields good crop every year; it ripens shortly after Latham. July 10-12.

Blackberries, Hedrick

The Famous Purple Raspberry, Sodus

The Giant MORRISON A GIANT NEW BLACK RASPBERRY

This variety, which originated in Northern Ohio, is highly praised by growers everywhere. Extremely large, shiny, jet-black berries of fine flavor and less seedy than other sorts; excellent for market and home use. The strong, vigorous vines are very productive and free from disease and very long lived. Recommend this variety without reservation to those who want the best black Raspberry.

BLACKBERRIES Hedrick

Here's a new Blackberry introduced by Dr. Geo. L. Slate at the New York Experiment Station. Bound to become the country's leading Blackberry. For years the bearing habits of the standard Eldorado variety have been irregular. Plants would make excessive growth, but would be shy in the bearing of fruit. For that reason, intensive breeding work has been going on at the New York State Experiment Station to improve Blackberries. The berries are somewhat larger than Eldorado and are moderately firm, without core and of good quality. Ripens in Western New York during the latter part of July. If you have never had much success growing Blackberries, we would suggest that you try this new variety. For home use and commercial production, there is a need for good Blackberries.

SUPERFECTION NEW SENSATIONAL EVERBEARER

Will produce berries 90 days after planting. Berries round, of firm texture; dark red color all through. Will ship long distances without losing color or firmness. Bears an abundance of large berries from spring until frost. A hundred plants in your garden will produce enough berries for an average family. Good for the small gardener, as a commercial proposition, and can't be beat for its zippy, sweet flavor.

Beauty and Grace

FOR YOUR LAWN

CHINESE ELM

A very rapid grower, growing to a height of 30 to 40 ft., with small dense foliage. Excellent for tall hedge or windbreak. Makes remarkable shade in five short years. A wide spreading tree with slender limbs and drooping twigs. 6-8 ft., \$3.25; 8-10 ft., \$4.25.

ROSE TREE of CHINA (*Prunus Triloba*)

Branches are hidden under a fleecy cloud of bright pink double blossoms resembling small pink Roses, even before leaves are out in the spring. A breath-taking sight in full bloom, especially when it reaches full height of about 4 to 6 feet. Should be included in every yard. Very hardy and easy to grow.

	Each	3 for
2-3 ft.	\$2.00	\$5.75
3-4 ft.	2.50	7.00

Postpaid

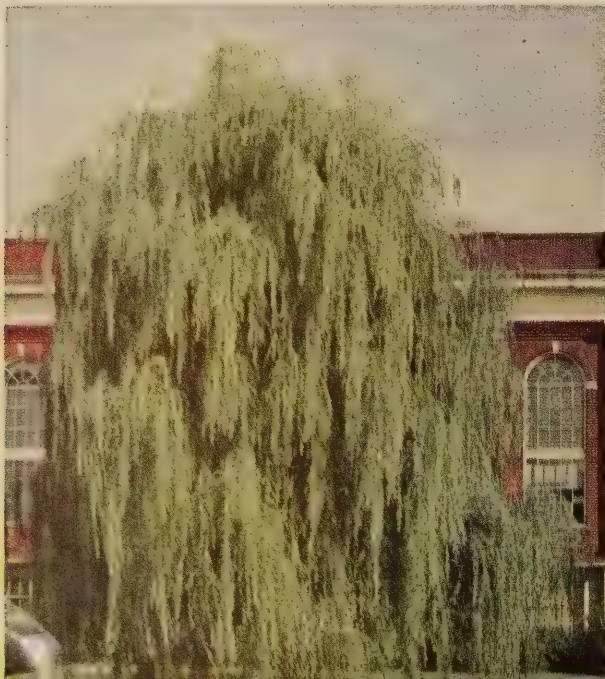

RED JAPANESE MAPLE

Grows no taller than 8 to 10 feet. Leaves a startling crimson all summer. Makes an excellent specimen for side yard or in formal garden. Has best color when in full sun, but will tolerate moderate shade. Trees moss balled. 1-1 1/2 ft., \$6.50, postpaid.

WISCONSIN WEEPING WILLOW

There are few trees that can be used to such advantage for cheery winter effects. Grows fast, adapted to a variety of soils and uses. Is very hardy, and beautifully effective near pools, along drives and on lawns. Grows 25 to 30 feet tall.

	Each	3 for	5 for	10 for
4-5 ft.	\$1.50	\$3.50	\$ 6.00	\$ 9.00
5-6 ft.	2.00	5.50	8.50	14.00
6-8 ft.	2.50	6.50	11.00	19.00

RED-FLOWERING CRAB

(*Malus Floribunda*)

This small tree is round-topped with single, carmine buds that change to pink and then white. Very heavy bloomer with small blood-red fruits, which can be used for jells. Will stand severe winters and drought. 15 to 20 feet at maturity. 4-5 ft., \$2.50; 2 for \$4.75, postpaid.

Lovely Flowers **BRIGHT FOLIAGE**

TREE WISTERIA

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers completely cover the tree during May, transforming it into a sheer beauty. On the lawn they develop into beautiful specimens, increasing in beauty and dignity each successive season. Can be kept trimmed to a height of 6 to 8 feet.

Grafted, Sure-to-Bloom, Balled in Peat,
3-4 ft., \$4.95 each, postpaid.

GOLDEN CHAIN TREE

No picture can do justice to this rare, low growing tree. Its long clusters of pure golden yellow are similar in form to the well known Wisteria, and often reach 18 inches in length, as many as 6 or 8 clusters on a small twig. Does well in either partial shade or full sun. A show plant all season with its decorative green bark and large, clover-like leaves. 4-5 ft., \$4.75, postpaid.

EUROPEAN MOUNTAIN ASH

Much more satisfactory than the native species, since it fruits more prolifically and has more compact habit. Large flat clusters of white flowers in the spring. Clusters of flashy, orange-red berries all over the tree in summer and fall. Deep green, clean foliage perfectly implements the graceful, upright habit. Grows to a height of 18 to 25 ft. with a spread of 15 ft. maximum. 5-6 ft., \$4.00 each; 6-8 ft., \$4.95 each; 8-10 ft., \$5.95, each.

ELEYI PURPLE LEAF CRAB

The tree is hidden in the spring by masses of wine-red blossoms. An outstanding specimen, with handsome bronze foliage turning to bright red in the fall. Attractive deep red fruits persist into the winter. The fruit makes a brilliant distinctive jelly. Tree grows to about 10 to 12 ft. tall and makes an ideal Ornamental Lawn tree. 4-5 ft., \$2.50; 2 for \$4.75, postpaid.

Kelly's Famous White Flowering CRAB TREE

This is undoubtedly the most beautiful Flowering Crab that can be grown in the North successfully. It is an upright tree, covered with beautiful white flowers which last a long time, followed by red-skinned fruit with white flesh throughout, and lingers until fall. The fruit is excellent for canning or jellies. Tree is very hardy and disease free. Outstanding sensation for single or group planting. 3-4 ft., \$2.00 each, postpaid.

Kelly's Shade Trees FOR LAWN

Sugar Maple

(Hard Maple). This is the tree that has such beautiful scarlet, orange and yellow foliage in the fall. It is native to many sections and is the source of the delectable Maple Sugar. Develops into one of the grandest of all trees. **6 to 8 ft., \$4.50. Shipped Express.**

Silver Maple

Most rapid grower of all Maples. A large, spreading tree which, at maturity, has a height from 60 to 70 feet. A cut leaf with a silvery cast, and also a silvery bark. Sap is good for sugar making.

4-5 ft.	\$2.25	6- 8 ft.	\$3.25

Shipped Express

Ginkgo

Has great vigor, growing from 40 to 60 feet high. In form, it varies from tightly pyramidal to wide spread irregularity. It is always fresh and green and in autumn, a cloud of gold. The leaves of this tree are fan-shaped and the branches are nearly parallel. Does well in any soil. A very picturesque tree. **5 to 6 ft., \$4.50. Shipped Express.**

TULIP TREE

Lovely native tree. Tall growing, with stately habit. Large irregular leaves make it ideal for quick shade. Has numerous Tulip-like flowers in the spring, as tree matures. Blooms are yellow marked with orange. **5 to 6 ft., \$2.50; 6 to 8 ft., \$3.00. Shipped express.**

SCHWEDLER MAPLE

This is a beautiful tree in all seasons. In the spring, the foliage is a reddish purple, followed by a bronzy green color in the summer. It is very attractive in the fall when its foliage is a golden yellow. Recommended for specimen planting in lawns. Symmetrical in growth. Not fast growing. **6-8 ft., \$5.50; 8-10 ft., \$6.50. Shipped express.**

Stately PIN OAK

For an artistic, attractive shade tree, it is one of the fastest growing of the Oak family. The foliage is rich green, deeply cut, glossy copper in late fall. Generally disease and insect free. At maturity stands 30 to 40 ft. Grows in a symmetrical pyramidal form. **6 to 8 ft., \$6.00. Shipped express.**

and STREET PLANTING

Norway Maple →

The Best All Around Shade Tree

Recognized as the finest shade tree for generations. Strongly resistant to storm, very clean in habit, the leaves will withstand smoke, soot and attacks from insects. Rich indeed is the city whose inhabitants plant Norway Maple as a permanent street tree. Its dense leaves are a rich green in color, and hold on the tree longer in the fall than most Maples, without much change in color. A good tree for street or lawn specimen plantings where good form and shade are needed. Reaches a height of 30-50 ft. **6-8 ft., \$4.50; 8-10 ft., \$5.50, shipped express.**

LOMBARDY POPLAR—Good for Wind Screens

Tall, fast growing, spirelike tree. Adapted to wide range of soils. Everybody knows the striking appearance of this tall, narrow-growing tree, like a church spire. Ideal for screening, windbreaks and backgrounds. When used for these purposes, plant 5 to 6 feet apart.

	Each	10	100

MORaine LOCUST

**A Worth-While Garden Addition
No Seed Pods—Fine Foliage—Wide Spreading**

(Plant Pat. 836)

This is a vigorous, fast-growing, seedless tree, shaped much like American Elm, but not susceptible to disease. A clean tree with no ugly, dangerous thorns, and no seed pods. The leaves are so fine that, when falling, they practically disappear into the grass.

Its branches arch up and out, giving a wide-spreading vase shape that reaches above a two-story house without obstructing the view or air circulation. Fine foliage makes plenty of cool shade, but lets enough sunlight through for good lawn growth, but not enough for crab grass growth.

Will thrive in spite of smoke and soot, on all kinds of soil. It is hard wooded; bends under strains of wind and snow, but rarely breaks or splits. **5-6 ft., \$6.00. Shipped Express.**

Lombardy Poplar

Moraine Locust

Norway Maple

NIOBE WEeping WILLOW Golden Yellow Bark

A graceful weeping tree for lawn or beside a rock wall, for planting near pools, banks or streams. Has golden yellow bark, narrow green leaves, silvery beneath, and long, drooping branches.

	Each	2
3-4 ft.	\$1.50	\$2.75

Graceful Drooping Weeping Willow

LAWN TREES

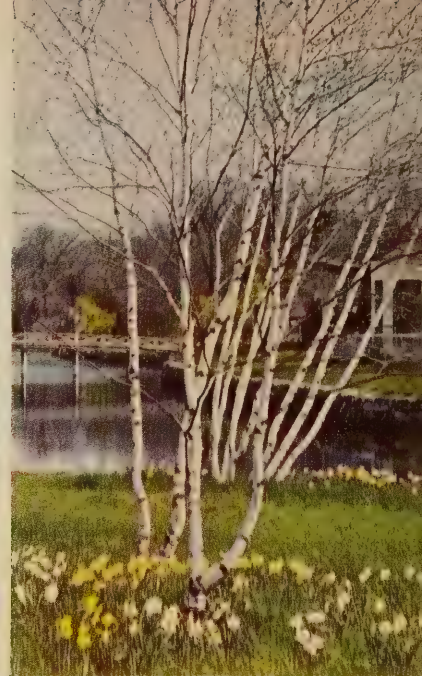

WHITE DOUBLE FLOWERING DOGWOOD. (*Cornus Florida*.) Has all the charm, artistry, and adaptability of the popular White Dogwood, and in addition bears double flowers. Very hardy and heavy-flowering. A small tree which grows in shade or sun and in ordinary soils, even in somewhat wet places. Typical bright red berries and red fall foliage. **3-4 ft. trees, \$2.50, postpaid.**

RED FLOWERING DOGWOOD. (*Cornus Florida Rubra*.) Grows to a 12-ft. tree. Everyone knows this lovely artistic tree. Produces a great profusion of large rose-red flowers in the spring; glossy red berries in the fall. A most adaptable tree; adds greatly to any landscape picture because of its fall fruit, red fall color and unique branching habit. **18-24 in., \$3.00; 2-3 ft., \$3.75, postpaid.**

REDBUD (Judas Tree). Live pink flowers cover every twig and branch, producing a breath-taking display early in the spring. Makes a very graceful 20-ft. tree. Large, healthy, heart-shaped leaves add a tropical cast to the landscape picture. A beautiful specimen even in the smallest yard. **3-4 ft., \$2.00, postpaid.**

WHITE CLUMP BIRCH. In naturalization, or as a lawn specimen, this lovely, multiple-stemmed tree is most effective. The white bark of its 3 or more trunks adds great charm to the landscape picture. Growth is gracefully upright, with horizontal branches. Reaches a height of 35 feet. **3-4 ft., \$3.00, postpaid.**

PAUL'S SCARLET HAWTHORN. Lovely small tree, growing about 15 ft. tall, with spreading branches. The leaves are broad, flowers a brilliant rosy red, double, in large clusters and produced in immense quantities. The fruits are scarlet. Well suited for the small yard. **4-5 ft., \$3.50, postpaid.**

CUT LEAF WEEPING BIRCH. Graceful, weeping branches, finely cut foliage and shimmering white bark, make this one of the most beautiful trees. Although not particular as to soil, the Cut Leaf Weeping Birch prefers a moist location and a sunny spot. Grows to 35 ft. in height. **5-6 ft., \$3.50, postpaid.**

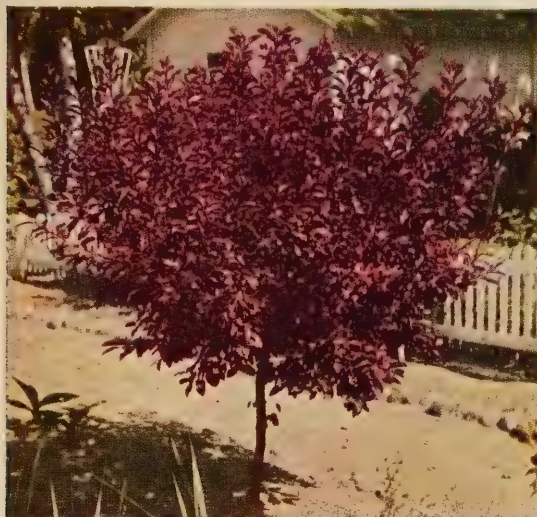

KWANZAN FLOWERING CHERRY. Spectacular Flowering Cherries of Washington Tidal Basin, this one superb variety is always the most impressive. Trees bloom a year or two after transplanting. Grows 20-30 ft. tall. Double, bright rose-pink flowers completely clothe the branches in early spring. **3-4 ft., \$3.25, postpaid.**

Tree Hydrangea

TREE HYDRANGEA

Large, pyramidal trusses of pure snow-white blossoms appear in early August. As fall approaches, they change to a luminous pink. At this stage they may be cut for all winter, dry bouquets. Blossoms measure a foot long and 6 to 8 inches wide. A low growing tree, standing not more than 4 to 6 feet in height. **2 to 3 ft., \$2.35; 3 to 4 ft., \$2.75, postpaid.**

Ruby Tree

RUBY TREE

Prunus Pissardi

Leaves are purple and more lasting than many purple-leaf plants. Grows approximately 10 feet high and gives excellent foliage contrast in a shrub border.

RIVERS' PURPLE-LEAVED BEECH

One of the most colorful and beautiful of all trees and a mature specimen is one of the most valuable of all sorts. It is easily grown and long-lived. Leaves come out a deep maroon in the spring, turn gradually to a dark maroon-purple in summer, and in fall a rich purple-brown. Shapely in growth, rich in color, it will add that final touch of elegance to your lawn. Be sure to plant this variety as it is known to man to be one of the finest and best trees. **3-ft. grafted trees, each \$3.50, postpaid.**

Bechtel's DOUBLE FLOWERING CRAB

Huge, double, light pink flowers hide the branches with rare beauty in the spring. Ideal for smaller lawn. Formal type; broad-symmetrical, pyramidal style. Distinct lobed leaves. **2-3 ft., \$2.00; 3 to 4 ft., \$2.75, postpaid.**

MAGNOLIA SOULANGEANA

Fragrant, huge, tulip-shaped flowers in early spring, rosy white inside, lively rose color outside. Leathery, deep green, waxy foliage follows the flowers, providing a restful mass of cool green for the summer. Makes an upright rounded tree growing to 12 to 14 feet. A magnificent lawn specimen, doing well in any soil having good drainage. **18-24 in., \$3.50; 2-3 ft., blooming size, \$4.95; 3-4 ft., \$6.00, postpaid.**

EVERGREENS *for Permanency*

GLOBE ARBOR-VITAE

A natural globe-shaped evergreen. Has broad fan-shaped leaflets. It is dwarf in its habit of growth, usually not growing over 3 feet tall or 3 feet in diameter. Fine for doorway and foundation planting or for formal designs, tubs and urns. **8-10 in., heavy transplants, \$1.50 each; 2 for \$2.90, postpaid.**

SPREADING PFITZER'S JUNIPER

This evergreen naturally grows in a low, wide spreading habit. It will stand considerable shade and crowding, which makes it a favorite for foundation and informal plantings. If kept untrimmed, will spread 4 to 5 feet. Can be kept low to the ground by trimming. **10-15 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS CUSPIDATA NANA (Brevifolia)

Dwarf Japanese Yew
Rarely over 5-foot spread and 4-foot height. One of the best dwarf evergreens. Thick, dark green foliage. Slow growing. Makes excellent hedge requiring very little shearing. **8-12 in. transplants, each \$1.75; 2 for \$3.25, postpaid.**

Hicks' Yew Taxus Hicksi

A narrow, upright Taxus with vertical branches. Can be kept trimmed to a desired shape and height. It has rich, dark, glossy green color, making it very popular. Tree resistant to extremes of heat and drought. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS - Yew

SPREADING JAPANESE YEW, TAXUS CUSPIDATA. This evergreen usually grows more wide than tall. Branches out from the bottom with several stems, developing into a bush form. Rich, dark green foliage with numerous crimson berries in the fall. Does well in sunny and northern exposures. Fine for foundation plantings. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS CAPITATA

(Upright, Japanese Yew.) The normal habit of this Yew is a pyramidal form; broad at the base and tapering to the top of the tree. A rapid growing tree, so can be trimmed back at least twice during the summer. **15-24 in. transplants, \$2.50 each; 2 for \$4.75, postpaid.**

Pyramidal Arbor-Vitae

On account of its rapid growth, its bright green color, its shapely even pyramidal habit and ease of trimming, this evergreen ranks among the leading ones for the Eastern United States. Will grow 15 feet tall but seldom over 2 feet in diameter. May be freely cut and trimmed and thereby kept within any bounds necessary. **12-18 in., heavy transplants, \$2.00 each; 2 for \$3.90, postpaid.**

Strong Sturdy Plants - Best Varieties

Kelly's Fine Hardy Garden Lilies

The Queen of the Garden

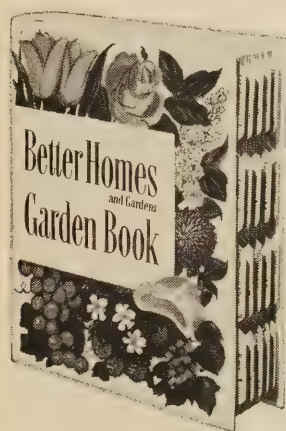

REGAL LILY. One of the hardiest Lilies in cultivation. Stems grow 4 to 5 feet high on which are produced gorgeous large white flowers, the center of which is flushed with yellow, shading to brown on the "ribs." The almost transparent petals have a delightful pearly tint. The Regal Lily when rightly established will produce from 15 to 20 flowers each year. **50c each; 4 for \$1.75; 8 for \$3.45, postpaid.**

A TRUE PINK LILY (*Lilium speciosum rubrum*). Wonderfully beautiful and perfectly hardy. Heads of 10 or more delicately fragrant, rose-pink blooms daintily dotted with crimson, on 3 to 4-foot plants. Excellent in the garden and for bouquets or corsages. Blooms in August. **75c each; 4 for \$2.85; 8 for \$5.45, postpaid.**

THE GARDEN EASTER LILY (*Estate Lily*). The same lovely, pure white flowers, rich green foliage, and delightful fragrance in the August garden that is so familiar at the Easter season. Hardy, too. 2½ ft. **75c each; 4 for \$2.85; 8 for \$5.45, postpaid.**

A YEAR-ROUND GUIDE TO PRACTICAL HOME GARDENING

Now you can get down-to-earth advice on all phases of gardening, landscaping and lawn care, from Better Homes and Gardens editors. You'll see how to grow beautiful flowers, prize-winning fruits and vegetables, how to make your lawn velvety green. Everything clearly explained in pictures and everyday language. Written for the beginner and experienced gardener alike.

Lavishly illustrated in full color. 520 pages, 1660 illustrations. Tab-indexed. Loose-leaf bound. Washable cover.

Only \$3.95, postpaid; or \$3.00 with a \$10.00 nursery order.

WISE GARDEN ENCYCLOPEDIA, \$5.00

Edited by E. L. D. Seymour, assisted by 40 experts. Over one million copies of America's favorite "Gardener's Bible" sold! New, a bigger-than-ever edition enriched with 64 pages of FULL COLOR pictures and a brand-new supplement for the beginning gardener.

Complete step by step instructions on planting, propagation and care of every type of vegetable, fruit, tree, flower, vine—everything that grows.

1,400 Pages, 10,000 Articles, 1,500 Pictures.

Only \$5.00, postpaid; or \$3.50 with a \$10.00 nursery order.

GARDENIA

The thick glossy foliage surrounding the creamy white blossoms of the familiar Gardenia make this dwarf shrub a prize addition to your terrace or sun room. Grow it in pots and enjoy its exotic beauty all year, inside or out. Unequaled for its rich perfume. Very strong plants. **Blooming age plants, 95c each; 2 for \$1.85, postpaid.**

New Climbing Snowbird

HEAVY FLOWERING *Climbing Roses*

All Kelly 2-Year Nursery Grown Bushes

BLAZE. (Red.) Plant Patent 10. Grows in true pillar form. Blooms early, followed by repeat blooms throughout the summer and fall seasons. Plants hardy, bright green foliage and sturdy canes. Color is intermediate scarlet and does not fade readily. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING AMERICAN BEAUTY. Has been a national favorite in the Rose garden for over two decades. A very fragrant, very beautiful rosy carmine variety that heaps and piles its blooms all over your trellis, porch or fence. Large brilliant flowers. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING PEACE. Plant Patent No. 932. Peace is now a top favorite with Rose growers everywhere. This new climbing sport has the same fine foliage and strong stems and will give you the same huge perfectly formed flowers as the ever popular Hybrid Tea. The full ovoid bud is deep yellow with the edges of the petals picotee cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and Apple blossom. **\$2.50 each; 3 for \$6.60, postpaid.**

CLIMBING SNOWBIRD. A small to medium sized climbing Rose, but one that is a real asset to any Rose garden. Almost never is it without exquisite, long, flaring, white buds and snowy, many-petaled, high-centered flowers. Our guess is that it will outbloom any other white Rose in your garden by at least two to one. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CRIMSON GLORY. Plant Patent No. 736. Imagine the magnificent Crimson Glory in the form of a Climber! The rich crimson color, the fascinating fragrance, the perfectly formed blooms and all the vigor and profusion that makes this Rose outstanding in its Hybrid Tea form, have been captured in this amazing Climber. Large, high-centered crimson Roses on strong stems cover the plant for a long period. **\$2.00 each; 3 for \$5.25, postpaid.**

GOLDEN CLIMBER. Climbing form of the beautiful Tea Rose "Golden Charm." We recommend this to those of you who want a golden yellow climber to complete your color range. Vigorous grower and blooms resemble those of the Hybrid Tea. May be cut in bud and keep well as blooms open. Buds are deep yellow opening into lighter yellow petals. Fragrant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

NEW DAWN. (Pink.) Perfect Hybrid-Tea-like blooms all season of Apple-blossom-pink, and a delicate appealing old rose fragrance. Superb for use in bouquets and arrangements. Fine long stems. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

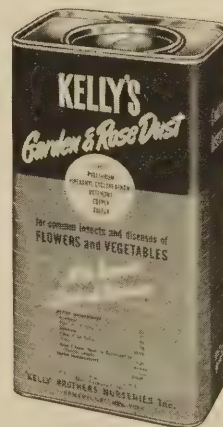

PAUL'S SCARLET CLIMBER. Midseason. Vivid scarlet and marveously attractive, with a great mass of bloom. The colorful show keeps up for weeks. The brilliant color does not burn or fade and the bloom in June is profuse, in great clusters all over the plant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

KELLY'S PROLIFIC BLOOMING

Floribunda ROSES

for Masses of Color
Hedges — Rose Gardens —
Shrubbery Border

FLORADORA

Dazzling bright cinnabar color with shades of scarlet. Buds are exquisitely formed, produced in profusion on a neat, symmetrical bush. Foliage glossy olive-green. Grows to a height of 2½ feet. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

VOGUE (Patent No. 926)

The Sensational New Floribunda. An intensive brilliant cherry-coral color with perfectly formed, high-centered, Hybrid Tea-shaped, 3 to 4 in. flowers. Has a delightful fragrance. Grows exceedingly well, reaching a height of 2½ to 3 ft. or more. **Prices: \$2.25 each; 3 for \$6.00, postpaid.**

IMPROVED LAFAYETTE

Medium-sized, deep glowing red flowers, suffused with vivid crimson. Blooms profusely. One of the finest roses for bedding, flowering without fail until hard frost. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

FASHION (Patent No. 789)

Finest Floribunda Rose ever created. Oriental red buds open gradually to a lighter, luminous coral suffused with gold. Constant new growth replaces the old, so it is always covered with clusters of exquisite blooms. Height 2½ to 3 ft. **Prices: \$2.00 each; 3 for \$5.25, postpaid.**

RED RIPPLES

A clear true red in both bud and open flower, continuously produced on a strong plant 3 to 4 feet tall. In our modest opinion there is none better. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

PINOCCHIO (Patent No. 484)

Extremely hardy, always in bloom with clusters of exquisite pointed buds of rich salmon, flushed with gold at base, gradually changing to soft clear pink with deeper pink edges. Fruity fragrance. Height 2 ft. **Prices: \$1.50 each; 3 for \$3.90, postpaid.**

CAMEO

Color shell-pink and salmon with a glow of gold. Massive clusters of small, long-lasting, semi-double flowers. Very slight fragrance. The "hedging Rose" unsurpassed for mass color, vigorous growth and abundance of healthy foliage. Grows to a height of approximately 2 to 3 ft. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

ELSE POULSEN

Color, bright, lasting rose-pink. Great clusters of medium to large-semi-double, open flowers are borne on long cutting stems. Mild but delightful fragrance. An erect, thrifty bush that is ideal to use in combination with flowering shrubs in foundation and border plantings. Grows to a height of approximately 3 to 4 ft. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

GOLDEN SALMON

Blooms in dazzling orange-salmon. A Rose that you will love more and more as you observe its masses of blooms in your own garden next season. Very tough and easy to grow. Four or five plants in a group make an amazing display even in large gardens. **Prices: Each \$1.35; 3 for \$3.85; 6 for \$7.25; 12 for \$12.95, postpaid.**

**You Want Your Roses to Grow and Bloom Satisfactorily—So Do We—
Pay Particular Attention to the Instructions Below**

Consider these simple instructions and you will have little difficulty in growing beautiful Roses.

Roses like a sunny location and should have at least a half day's sun. Any good garden soil that is well drained will be excellent for Roses. Fertilizer or well rotted manure if available should be worked into the soil.

Unpack and plant Roses as soon as received from the nursery if at all possible. If you cannot plant at once, unwrap the plants and heel in the ground until ready to plant in a permanent location.

In planting, set the plants with the bud, or joint, just above the roots, about 2 inches below the surface of the soil. Have holes large enough to avoid crowding the roots and be sure the soil used for back-filling is finely pulverized. Tramp soil firmly a couple of times as the hole is filled and leave a slight depression around each plant to retain water.

As soon as planting is completed see that all plants and the soil around them is soaked thoroughly. After the water has settled, hill the dirt up around each plant to a height of 6 inches. As soon as the plant begins to sprout buds, level off this dirt to your bed level.

Keep the Rose planting well watered at all times. To discourage mildew, only water in the morning or irrigate the bed, being careful not to wet the foliage too much. A reasonable application of fertilizer applied twice during the summer months, with an interval of at least 30 days between applications, will induce added growth and extra quality in blooms.

Each succeeding spring all canes should be cut back to 6 inches. This causes strong new growth and abundant bloom to develop. For winter protection in cold climates, hill the dirt up around each plant to a height of 8 to 12 inches in late fall before the ground freezes. Level off as soon as danger of hard frosts is over in spring and cut plants back as directed.

The Living Fence

ROSA MULTIFLORA

**Controls Erosion • Provides Wild Life Refuge
Adds Beauty to the Landscape**

Rosa Multiflora is Nothing New. It is the understock or root on which named Rose varieties are budded. Originally it was imported from Japan. It has come into prominence as a result of work done by the U. S. Department of Agriculture on erosion control in the western states. Because of its fast growth and hardiness, it has also been used on large farms and estates for fences. Extensive advertising taking advantage of the name Rose, has brought the plant into big demand as a hedge for small properties. We grow the plant and want to sell it, but are zealous in our obligation to our customers in stating that we can't recommend Rosa Multiflora for small lots. We will gladly sell it to you if you want to try, but we would not want you to be led astray by the glamorous claims that have been made for it.

Facts About the Rosa Multiflora and Its Growth

1. Can be planted 1 foot apart. Its thorns will keep children and animals of all kinds in bounds.
2. Produces dense growth—white blossoms in June—red berries in late summer and fall.
3. Extremely hardy—does well in most all soils.
4. Extensive pruning during the growing season required to keep the hedge small.
5. Grows 8 feet or more in height and 6 to 8 feet in width if not kept trimmed.
6. The red berries will attract birds of all kinds, including pheasants and grouse.
7. Grows 2 to 3 feet in one season.
8. Ideal as a ground cover on steep banks and slopes.
9. Plant just as you would any other shrub.
10. Requires no special care. Not subject to any serious diseases or insect attacks.

Rose Fence

For a good thick hedge, the plants should be trimmed back to 6 or 8 inches to promote thick growth. You can, therefore, see there is no advantage in planting larger size plants than we offer.

A New Novelty

AMERICAN WONDER LEMON

A New House Plant You'll Surely Want

Covered with waxy white flowers. Several times each year, this attractive **HOUSE PLANT** will produce Lemons, sometimes weighing as much as a pound. Known as Ponderosa Lemon, this plant is different than any you have ever grown.

Large 2-yr. fruiting size plants that should bloom and fruit this year.

\$1.65 each; 2 for \$3.00, postpaid.

American Wonder Lemon

2 Good Creepers for Banks and Foundation Coverage

Provide a Natural Effect where Grass Will Not Grow
PACHYSANDRA TERMINALIS

(Japanese Spurge)

EVERGREEN GROUND COVER

The most popular of evergreen ground covers. It spreads rapidly, giving a finished look to an underplanting. Since it thrives in the shade, it is especially useful under dense shade trees where grass will not survive. Also good for a steep bank when mowing is difficult. Very useful as a combined ground cover and root protector when planted under Rhododendrons, Azaleas, and Laurels. Pachysandra puts the finishing touch to a foundation planting. Plant four or more to one square foot.

HALL'S HONEYSUCKLE VINE

"For That Stubborn Spot, Beautify with a Ground Cover"

White and gold trumpet flowers are very fragrant and remain during the entire summer. Attracts bees and humming birds. The foliage remains green in winter with some protection. Excellent cover for steep banks. Will climb on trellis or tree. Fruit is yellow; very showy in winter against green leaves. Often grows to a length of 10 to 15 feet. Plant about 3 ft. apart in staggered rows for ground cover. **75c each; 3 for \$2.10, postpaid.**

Azalea Mollis

From Holland AZALEA MOLLIS

Their flowers are lovely and add so much to any planting. We have imported these from Holland. Large blossoms, blooming in early spring. Fine bushy plants, about a foot tall. They prefer part shade, and do best in a soil mixed half and half with Peat Moss. The roots are very close to the surface, so a Peat Moss mulch should be kept around the plants after setting out. Keep well watered. We offer them in the following colors:

Red, Orange, Yellow, \$2.50 each; 2 for \$4.75, postpaid

SPECIAL COLLECTION

1 Each of 3 Colors Listed, \$6.50, postpaid

GOLD DROP POTENTILLA

A charming, small, compact growing shrub which is cheerfully brilliant throughout the entire summer and fall. It is closely and densely covered with fern-like leaves, studded with intensely brilliant golden yellow, Buttercup-like flowers. A mound of green and gold all season.

HEDGE PLANTS *for every type of planting*

Healthy... Well-Rooted... Priced Right

Sheared Barberry

GREEN LEAF BARBERRY THUNBERGI

Best all-purpose hedge of marked excellence because of its bright green foliage, changing to brilliant colors in the fall. Has bright scarlet berries throughout the winter. Dwarf and regular spreading in habit. Grows well in shade, used extensively in landscape work. Very hardy and has never been known to winter-kill. It bears and shears well and makes a dense hedge.

12-18 in., 2-yr. seedlings: 10 for \$2.50; 25 for \$5.50; 50 for \$10.00; 100 for \$18.50.

18-24 in., 2-yr. seedlings: 10 for \$3.00; 25 for \$6.75; 50 for \$12.50; 100 for \$23.00.

18-24 in., 3-yr. heavy transplants: 10 for \$5.95; 25 for \$16.50; 50 for \$25.00; 100 for \$45.00.

RED LEAF BARBERRY

Very popular for specimen grouping and for edging taller plantings of shrubs or evergreens. Glossy purplish red leaves. Makes a brilliant colorful hedge.

The Effective BLUE LEAF HEDGE

See color illustration page 66.

A new, charming, silvery blue-green shrub. Grows anywhere, in sun or shade, dry, wet or heavy soils where other plants perish. If left untrimmed, its feathery, willowy foliage makes a beautiful, compact, dwarf hedge 3 feet high and 2 feet wide. If trimmed it makes a colorful, low, formal hedge. Just the thing for low edgings, around beds or along walks. Single specimens are delightful in rock gardens.

18-24 inches	4.95	11.25	18.95	28.75

MIDGET HEDGE - *Teucrium Chamaedrys*

A low growing hedge suitable for edgings or growing in front of a wall. Resembles dwarf Boxwood, holding its leaves 10 months of the year. Grows 10-15 inches but can be sheared at any height lower than that. Hardy and thrives in most locations. Should be planted 6 inches apart for a dense hedge. 45c each; 10 for \$3.95; 25 for \$8.75; 50 for \$14.95; 100 for \$24.95, postpaid.

BUSH HONEYSUCKLE - *Lonicera tartarica*

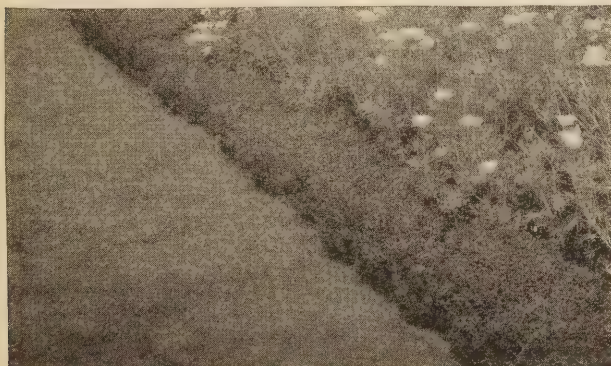

Very hardy growing in the poorest soils. Flowers freely in May and June with fragrant pink flowers followed by red berries in the fall, that are attractive to birds. Rapid growing, attaining a height of 8-10 ft. and is ideal for specimen planting, hedging or screening purposes. 12-18 inches: 10 for \$3.95; 25 for \$8.25; 50 for \$14.95; 100 for \$24.95, postpaid.

BRIDAL WREATH - *Spirea Van Houttei*

One of the best known shrubs of America. Exceptionally hardy and will grow in either sun or shade. Attains a natural height of 5-6 ft. and is completely covered with clusters of small white flowers in June. Can be trimmed any time during the summer. Plant 3 feet apart for an informal hedge.

Midget Hedge

Amur River PRIVET

Hardy Everywhere

*They Withstand The
Severest Winters*

Best for northeastern conditions. Will grow 10 feet in height but may be pruned to any height and sheared to desired form. Branches are upright, foliage oval or oblong; can be made very dense by pruning. Resembles California Privet in growth. Very hardy and almost an evergreen, holding its green leaves almost all winter.

12-18 in., 12 for \$2.50; 25 for \$4.75; 50 for \$9.00; 100 for \$17.00.

18-24 in., 12 for \$3.00; 25 for \$5.50; 50 for \$10.50; 100, \$19.95.

Not Postpaid

CHINESE ELM For Any Size Hedge

Extremely Hardy—Rapid Grower

This is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in late fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all the top, leaving only 3 to 4 inches above ground. Plant 8 inches apart. 18 to 24 in.: 12 for \$1.25; 25 for \$2.25; 50 for \$4.25; 100 for \$8.25, postpaid.

Amur River Privet

Kelly's 1953 "SPECIALS" for the Garden

HYPERICUM, Hidcote

From a famous estate in England comes this new variety. It grows into a twiggly shrub about 18 inches tall and about the same in diameter. Throughout the summer it is covered with bright yellow cuplike flowers, about 2 inches in diameter, in a grand mass display. Flowers are fragrant and appear late June, continuing until mid-October. **\$2.00 each; 3 for \$5.50, postpaid.**

The Blue Leaf Hedge
See description and prices
page 65.

PYRACANTHA, Firethorn (Coccinea Lalandi)

A most remarkable berried shrub that retains its foliage all winter. The attractive long trusses of pure white flowers are only a prelude to the big show. An abundance of brilliant orange-scarlet berries follow the bloom and the bush becomes a "mound of flame" with the effect lasting well into the winter. Blooms in May. Grows 4-6 feet. **2-yr., 12-15 in., \$2.25 each, postpaid.**

DWARF RED BARBERRY

CRIMSON PYGMY. New introduction from Holland. Grows 6 to 8 inches high, 15 to 24 inches across. Slow growing. Ideal for planting in front of shrub planting. Best color when grown in full sun. We deliver 2-yr. field-grown plants 6-8 inches in diameter. **Each \$2.00; 3 for \$5.50.**

Althea Coelestis

Bright morning-glory-blue flowers, 3 inches across, pop open every day from midsummer until winter. Pretty pansy-red centers and white pistils. Fine for cutting. Fancy green leaves. Grows 4 to 5 feet tall. **18-24 in., each 95c; 3 for \$2.70, postpaid.**

RHODODENDRONS

For Supreme Landscaping Effects

You'll be surprised at the growing speed of these Young Aristocrat Rhododendrons. They are small—they soon develop into fine, bushy, evergreen shrubs. You save money: you buy as low as 75c each in quantity. Quickly they grow into fine, bushy specimens, often valued at \$5.00 to \$10.00 each.

RHODODENDRON CATAWBIENSE

Grows 3-5 ft. tall. Leaves smaller than Maximum. Color of flower varies in shades of pink and rose. Grows in full sun but does best in partial or full shade.

	3	10	100
10 to 12 in.	\$3.00	\$8.75	\$75.00

RHODODENDRON MAXIMUM

Grows 5-6 ft. tall. Very hardy for full or partial shade. Color of flower varies from pink to white. Large clusters in June and early July.

	3	10	100
10 to 12 in.	\$3.00	\$8.75	\$75.00

KALMIA (Mountain Laurel)

Grows 6-8 ft. tall. Flowers vary from deep rose to pure white. Blooms from May to late June.

FORSYTHIA, Lynwood Gold

This splendid new Forsythia originated in Ireland, and we predict it will replace before many years, all other varieties of deep yellow color. It is one of several fine shrubs we have obtained in Europe for distribution in this country.

The branches are erect and literally smothered under golden yellow flowers from top to bottom. Not only are the flowers produced in the most profuse manner, but the individual blooms are better and fuller in form as well as of greater substance, apparently never minding bad weather. For a magnificent show of golden yellow, there is nothing better. It is superb for cutting and flowering in the house during the winter months. It has been carefully tested for several years, and we recommend it without hesitation. Ultimate height 5 to 7 feet, depending on conditions.

\$2.00 each; 3 for \$5.50, postpaid.

10 to 12 in.: **3 for \$3.00;**
10 for \$8.75; 100
for \$75.00.

PLANTING AIDS

Rhododendrons and Kalmia require an acid soil pH 5.0-6.0. See page 20 for directions for making soil acid. Besides using Aluminum Sulphate, use plenty of leaf mold or peat moss around the roots of the plants. They do well in the shade where there is a good amount of moisture.

Low Growing—Large Waxy Flowering

Tuberous Rooted Begonias

Add a Wealth of Color to Your Garden

Imported from Belgium, these bulbs put forth double camellia-like blooms from early summer 'til frost. Just right for that shady spot. Can be grown indoors also.

We offer them in **eight** colors: Crimson, Scarlet, Pink, Orange, White, Yellow, Copper, Salmon.

1¼ to 1½ inch, 6 for \$1.00; 12 for \$1.85, postpaid.

KELLY BROS. SPECIAL COLLECTION
10 Select Bulbs, Mixed Colors, \$1.50 Postpaid

The Aristocrat of Ornamental and Shade Trees

CRIMSON KING MAPLE

(Plant Patent No. 735)

You will want to be one of the first to own this new tree. It is a beautiful form of Schwedler Maple, originating in Europe. Like the Schwedler it develops a rounded, compact top of unusual symmetry, but differs in having foliage of deep, purple-crimson all through the growing months. Crimson King has been under close observation in this country for 10 years, and in every instance has kept its rich coloring throughout the season. It has been said: "Crimson King is beautiful beyond words." Grows 25-40 ft. tall. **4-5 ft., \$4.95; 5-6 ft., \$5.95, postpaid.**

HOPA CRAB

From early spring until freezing weather, this tree will be a delight to you. The beautiful deep red blossoms distinguish the Hopa Crab from other varieties. Before the leaves are fully developed the whole tree bursts into bloom, being completely covered with the most magnificent fragrant red flowers. It is hard to imagine anything more beautiful. The foliage is dark green with red cast. Flowers are followed by the prettiest tiny red Apples that bejewel the tree during the summer, and these can be used for jellies. The tree is half round in shape, growing to a spread of 15 ft. and a height of from 12 to 18 ft. **4-5 ft. trees, \$2.25 each; 2 for \$4.25, postpaid.**
